COVID-19 Lockdowns and the Urban Poor in Harare, Zimbabwe Johannes Itai Bhanye, Fortune Mangara, Abraham R. Matamanda, Lameck Kachena, 2023-12-09 This book focuses on the socio economic impacts of the COVID 19 pandemic and associated lockdowns on the welfare of the urban poor in the city of Harare Zimbabwe. The authors look through the lenses of the urban health penalty, the right to the city, complexity theory and distributive justice theory. These four theories help situate the COVID 19 pandemic and its impacts on the urban poor in the theoretical foundations that raise issues of how the poor are affected by disease health pandemics due to their living conditions. Uniquely, the authors use remote ethnography tools such as rich texts, video diaries and photo uploads to provide evidence-based stories of how COVID 19 mobility restrictions have affected poor urbanites in Harare. The book concludes that the COVID 19 pandemic mandatory lockdowns have deepened social and spatial inequality among the urban poor, threatening their right to the city. The socio economic impacts can upsurge poverty, increase unemployment and the risks of hunger and food insecurity, reinforcing existing inequalities and breaking social harmony in the cities even past the COVID 19 pandemic period. These socioeconomic impacts must be considered to make just cities for all from a right to the city perspective. The authors recommend that mandatory COVID 19 lockdowns should not only be treated as a law and order operation but as a medical intervention to stem the spread of the virus, backed by measures to safeguard the livelihoods of the urban poor while also protecting the economy. This means governments should provide social safety nets to informal sector operators whose income-generating activities are affected the most during the time of emergencies like COVID 19. Planners and policymakers should re-envision pandemic resilient cities that are just, equitable, resilient and sustainable.

Military Assistance on Request and the Use of Force

Erika De Wet, 2020-03-26 In countries such as Syria, Iraq, South Sudan and Yemen, internationally recognized governments embroiled in protracted armed conflicts and with very little control over their territory have requested direct military assistance from other states. These requests are often accepted by the other states despite the circumvention of the United Nations Security Council and extensive violation of international humanitarian law and human rights. In this book, Erika De Wet examines the authority entitled to extend a request for or consent to direct military assistance as well as the type of situations during which such assistance may be requested, notably whether it may be requested during a civil war. Ultimately, De Wet addresses the question of if and to what extent the proliferation of military assistance on the request of a recognized government is changing the rules in international law applying to the use of force.

Paramilitary Groups and the State under Globalization

Jasmin Hristov, Jeb Sprague, Aaron Tauss, 2021-12-30 This book examines the phenomenon of paramilitarism across Latin America and the Caribbean, Eastern Europe, Africa and Asia, offering a nuanced perspective while identifying key patterns in the way paramilitary violence is implicated in processes of capital accumulation, state building and the reproduction of social power. Paramilitary violence, a key modality of coercion in the era of globalization, has been pursued

by states and dominant classes in the Global South to reproduce or extend their power over subaltern groups Paramilitary groups are responsible for atrocities including extrajudicial executions disappearances torture rape and forced displacement The book integrates empirically rich investigations into an emergent theory of political violence capturing the relationship between parastatal armed actors capital and the state The analysis sheds light on globally relevant phenomena such as the end of the Cold War the shifting role of US hegemony and evolving nature of the nation state The book is suitable for academics graduate and upper year undergraduate students and policy makers in development human rights and violence prevention Given its interdisciplinary subject it appeals to scholars from a wide range of disciplines including political science sociology political anthropology development peace and conflict security and terrorism international relations and global studies **New Millennium Woes and Livelihood Struggles in Africa** Peter Thomas,Ngonidzashe

Marongwe,2021-05-19 One of the oldest survival pursuits undertaken by the weak and the downtrodden people across the world has been begging Going back to the ancient Christian biblical times up to the present epoch as well as across varying spatial settings in situations of trouble and tribulations parts of various communities have resorted to beggary to either overcome immediate adversities or longer term calamities Drawing on insights from two polar theoretical lenses of Social Constructionism and Social Deconstructionism and guided by a pithy study of the begging across the African continent especially by Zimbabweans this book troubles the various contours related to the subject of begging Inter alia the book considers the concept of begging the causes of the prevalence of begging across the world and particularly among Zimbabweans the challenges and benefits associated with the pursuit of alms the impact of begging in foreign lands as well as some of the strategies that beggars employ to maximize their collections and or profits What can be discerned from the book is that for many begging is one of the last resort undertakings with low pickings However from a utilitarian perspective begging has helped to sustain the impoverished livelihoods of Zimbabweans both inside and outside the borders of the country since the advent of a debilitating crisis experienced from the turn of the new millennium On the whole this book seeks to provoke further researches on an important socio economic area that affects many African communities but has so far been scantily researched The book is handy for students and practitioners in economic history African studies economics risk and disaster management social anthropology political science and development studies *Minerals Yearbook*

Mpho Ngoepe, Sindiso Bhebhe, 2023-12-06 *Indigenous Archives in Postcolonial Contexts* revisits the definition of a record and extends it to include memory murals, rock art, paintings and other objects. Drawing on five years of research and examples from Zimbabwe, Botswana and South Africa, the authors analyse archives in the African context. Considering issues such as authentication, ownership and copyright, the book considers how murals and their like can be used as extended or counter archives. Arguing that extended archives can reach people in a way that traditional archives cannot and that such archives can be used to bridge the gaps identified within archival repositories, the authors also examine how such archives are managed and authenticated using traditional archival principles. Presenting case studies from organisations such as Gay and Lesbian Memory in Action Archives (GALA) and heritage projects such as the Makgabeng Open Cultural Museum, the authors also analyse Indigenous family praises and songs and explore how such records are preserved and transmitted to the next generation. *Indigenous Archives in Postcolonial Contexts* demonstrates how the voices of the marginalised can be incorporated into archives. Making an important contribution to the effort to decolonise African archives, the book will be essential reading for academics and students working in archival studies, library and information science, Indigenous studies, African studies, cultural heritage, history and anthropology.

The Wealth of (Some) Nations Zak Cope, 2019-03-20 In this provocative new study, Zak Cope makes the case that capitalism is empirically inseparable from imperialism historically and today. Using a rigorous political economic framework, he lays bare the vast ongoing transfer of wealth from the poorest to the richest countries through the mechanisms of monopoly rent, unequal exchange and colonial tribute. The result is a polarised international class structure with a relatively rich Global North and an impoverished, exploited Global South. Cope makes the controversial claim that it is because of these conditions that workers in rich countries benefit from higher incomes and welfare systems with public health, education, pensions and social security. As a result, the internationalism of populations in the Global North is weakened and transnational solidarity is compromised. The only way forward, Cope argues, is through a renewed anti-imperialist politics rooted in a firm commitment to a radical labour internationalism.

Reimagining God and Resacralisation Alexa Blonner, 2019-05-14 This book shows that widespread resacralisation has been taking place, which is producing new ways of perceiving God and the divine. The last century has seen unmistakable changes in religious practices and the concept of spirituality right across the world. There was a broad expectation for much of the twentieth century that religious worldviews would eventually succumb to the challenge of secularist materialism, but this process of secularisation has yet to occur as predicted. The book begins by contrasting theories of secularisation and resacralisation. Throughout the book, conceptual threads or new religious themes related to this resacralisation are discussed in terms of three main categories: reimagining God's nature, substance and location; reimagining human value and purpose; and reimagining modes of redemption. Finally, the book considers how these threads are moving in various different directions and what the religious future might hold. This is a bold examination of contemporary spirituality that will appeal to

academics and scholars of religious studies new religious movements and the sociology of religion **International Law and Transitional Governance** Emmanuel H. D. De Groof, Micha Wiebusch, 2020-04-28 This volume examines the role of international law in shaping and regulating transitional contexts including the institutions policies and procedures that have been developed to steer constitutional regime changes in countries affected by catalytic events The book offers a new perspective on the phenomenon of conflict related transitions whereby societies are re constitutionalized through a set of interim governance arrangements subject to variable degrees of internationalization Specifically this volume interrogates the relevance contribution and perils of international law for this increasingly widespread phenomenon of inserting an auxiliary phase between two ages of constitutional government It develops a nuanced understanding of the various international legal discourses surrounding conflict and political crisis related transitional governance by studying the contextual factors that influence the transitional arrangements themselves with a specific focus on international aspects including norms actors and related forms of expertise In doing so the book builds a bridge between comparative constitutional law and international legal scholarship in the practical and highly dynamic terrain of transitional governance This book will be of much interest to practitioners and students of international law diplomacy mediation security studies and international relations

Cooperatives Jutta Guttherlet,2016-05-12 Solid waste is a major urban challenge worldwide and decisions over which technologies or methods to apply can have beneficial or detrimental long term consequences Inappropriate management of solid waste can lead to damaging environmental impacts particularly in the megacities of the Global South Urban Recycling Cooperatives explores the multiple narratives and interdisciplinary nature of waste studies drawing attention to the pressing social economic and environmental challenges related to waste management The book asks questions such as how do we define waste and our relation to it who is involved in dealing with waste and what power interactions become manifest over issues of accessing and managing waste In recent years informal cooperatives have emerged devoted to recycling household and business waste before reclassifying it and redirecting it to the authorities Hence these workers are able to reclaim

significant amounts of natural resources and thus contribute to the saving of resources and lessened waste management expenditures With particular reference to the Brazilian megalopolis of S o Paulo this book describes this paradigm shift in the general understanding of waste as unwanted discard towards the recognition of waste as a resource that must be recovered for reuse or recycling It would be of interest to students and policy makers working in international development and waste management The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Transformative Sustainable Development Kei Otsuki, 2014-12-05 Recent debates about sustainable development have shifted their focus from fixing environmental problems in a technocratic and economic way to more fundamental changes in social political processes and relations In this context participation is a genuinely transformative approach to sustainable development yet the process by which participation leads to transformation is not sufficiently understood This book considers how the act of participating in sustainable development projects can bring about social transformation that is considered to be fair and just by the participants and non participants in a broader societal context Drawing on ideas from social theory and applied anthropology the book proposes a reflexivity based framework to analyse participation as a type of social action underpinned by primary experience Development projects have a transformative effect when participants are given the opportunity to reflect on their experience share the reflection with others and open new space for collective deliberation and change The book applies this framework to assess community based participatory projects in the Amazon African slums and rural settlements and disaster stricken areas in Japan It also outlines potential institutions of governance to institutionalize the change by referring to current food governance drawing out lessons with international relevance This book will be of interest to students of sustainable development environmental policy and development studies as well as practitioners and policy makers in these fields
