### **Zimsec June 2014 Science Paper 3:**

Infrastructures for Peace in Sub-Saharan Africa Mediel Hove, Geoff Harris, 2019-06-14 Cultures of violence are characteristic of many countries in sub Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual And yet the wide variations in levels of violence within and between countries show that it is not inevitable rather it is the result of choices made at individual community and societal levels This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace Peace infrastructures vary hugely in sophistication and level The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations peace committees which serve local communities peace education and peace club programmes in schools mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non government efforts in peacemaking and peacebuilding The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace 1 It is the only book available which documents the experience and potential of nonviolence in post independence sub Saharan Africa 2 It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable 3 It explains how strategic planning can be utilised both to bring about change and to institutionalise it *The Southern African Development Community in Zimbabwe* Rich Mashimbye, 2024-02-13 This book narrates the unravelling of Zimbabwe a country that was once considered an inspiration on the continent of Africa in terms of socioeconomic development Recognising that many factors contributed to the collapse of the nation and that this collapse was a process that occurred over a long period it looks at historical events and processes like the colonisation of the country and dispossession of the indigenous people and the misuse politically motivated violence and economic mismanagement that followed under Robert Mugabe as the pivotal moments that precipitated the subsequent fall of Zimbabwe The book also examines the role that the regional intergovernmental organisation the Southern African Development Community SADC played in trying to help Zimbabwe overcome its security political and economic challenges **Sustainable Development in Africa** Walter Leal Filho, Rudi Pretorius, Luiza Olim de Sousa, 2021-07-09 This book serves the purpose of documenting and promoting African experiences on sustainable development which encompasses both formal and non formal education Sustainable development is very important to Africa but there is a paucity of publication which documents and promotes experiences from African countries Due to their complexity the interrelations between social economic and political factors related to sustainable development especially at universities need to be better understood There is also a real need to showcase successful examples of how African institutions are handling their sustainability challenges It is against this background that this book has been produced It is a truly interdisciplinary publication useful to scholars social movements practitioners and members of governmental agencies and private companies undertaking research and or executing projects focusing on sustainability

from across Africa As African nations strive to pursue the UN Sustainable Development Goals it is imperative to cater for the information needs seen across the continent and foster the dissemination of experiences and case studies which may support both on going and future efforts The scope of the book is deliberately kept wide and we are looking for contributions across the spectrum of sustainable development from business and economics to arts and fashion administration environment languages and media studies      *Masculinities under Neoliberalism* Andrea Cornwall, Frank G. Karioris, Nancy Lindisfarne, 2016-05-15 Neoliberalism has had a radical impact on the lived gendered experiences of people around the world But while the gendered dimensions of neoliberalism have already received significant scholarly attention the existing literature has given little consideration to men s identities and experiences Building on the work of Cornwall and Lindisfarne s landmark text *Dislocating Masculinity* this collection provides a fresh perspective on gender dynamics under neoliberalism Bringing together a series of short readable case studies drawn from new ethnographic fieldwork its subjects range from the experiences of working class men in Putin s Russia to colonial masculinities in Southern Rhodesia and from young British Muslim men to amateur footballers in Jamaica      *Electoral Politics in Zimbabwe, Vol II* Esther Mavengano, Sophia Chirongoma, 2023-08-08 Volume two of *Electoral Politics in Zimbabwe The 2023 Election and Beyond* argues that research into Zimbabwe s politics is multifaceted and topical particularly because for more than two decades now this Southern African state has been dogged by multiple problems including hyperinflation drought escalating poverty levels extremely high unemployment rates and political instabilities The volume s overall goal is to ignite intellectual discussions and practical action towards turning the political wheels that have been in place for decades The first segment examines the interface between gender and electoral politics in Zimbabwe The second part discusses the role of the media in Zimbabwe s electoral politics The third section reflects on the role of traditional leaders and religious discourses in Zimbabwe s electoral politics The book will be a key resource to colleges universities and organisations in Zimbabwe the Southern Africa region and even beyond      *State Capacity, Economic Control, and Authoritarian Elections* Merete Seeberg, 2018-03-09 Although the phenomenon of authoritarian elections has been a focal point for the literature on authoritarian institutions for more than a decade our understanding of the effect of authoritarian elections is still limited Combining evidence from cross national studies with studies on selected cases relying on recent field work this book suggests a solution to the paradox of authoritarian elections Rather than focusing on authoritarian elections as a uniform phenomenon it focuses on the differing conditions under which authoritarian elections occur It demonstrates that the capacities available to authoritarian rulers shape the effect of elections and high levels of state capacity and control over the economy increase the probability that authoritarian multi party elections will stabilize the regime Where these capacities are limited the regime is more likely to succumb in the face of elections The findings imply that although multi party competition and state strength may be important prerequisites for democracy they can under some circumstances obstruct democratization by preventing the

demise of dictatorships This text will be of key interest to scholars students and practitioners of democratization and to those who study autocracy and electoral authoritarianism as well as comparative politics more broadly

**Leading and Managing Open and Distance e-Learning (ODEL) Institutions in Africa** Cuthbert Majoni, 2022-10-18 Leading and Managing Open and Distance E Learning ODeL Institutions in Africa focuses on e learning especially in developing countries in Africa The outbreak of COVID 19 has forced most educational institutions including conventional institutions in higher education to embrace e learning as a tool to ensure that education is not paralysed but continues to thrive However the major challenge has been shifting focus from the conventional face to face mode to the e learning mode This calls for a change of mindset and a review of practices to ensure success in implementing e learning This book has 12 chapters that explore the leadership theories and approaches that influence administrative practices in ODeL institutions as well as student support within library and information services the complexities of student affairs the inclusion of students with special needs the contemporary issues of innovation and industrialisation and effective marketing techniques for the survival and growth of tertiary institutions It is hoped that the recipients of this book can acquire the theoretical and practical knowledge relevant to the successful implementation of e learning

**The World of Science Education** Femi S. Otulaja, Meshach B. Oggunniyi, 2017-09-12 Each volume in the 7 volume series The World of Science Education reviews research in a key region of the world These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel North Africa and the Middle East and Sub Saharan Africa The focus of this Handbook is on research in science education in mostly former British colonies in Sub Saharan Africa and the scholarship that most closely support this program The reviews of the research situate what has been accomplished within a given field in Sub Saharan Africa rather than an international context The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts The approach allows readers to review what has been done and accomplished what is missing and what might be done next

*The Return of Food* Tawodzera, Godfrey, Crush, Jonathan, 2016-06-14 The nadir of Zimbabwe's political and economic crisis in 2008 coincided with the implementation of a baseline household food security survey in Harare by AFSUN This survey found that households in low income urban areas in Zimbabwe's capital were far worse off in terms of all the food insecurity and poverty indicators than households in the other 10 Southern African cities surveyed by AFSUN The central question addressed in this report is whether food security in Zimbabwe's urban centres has improved AFSUN conducted a follow up survey in 2012 that allows for direct longitudinal comparisons of continuity and change The status of household food security in low income neighbourhoods in Harare was improved in 2012 relative to 2008 and yet persistently high rates of severe food insecurity demonstrate that the daily need to access adequate food continued to be a major challenge The key lesson for policymakers is that even in the context of overall

economic improvement food insecurity remains endemic among the poorest segments of the urban population Households are already accustomed to drawing on resources outside of the formal economy and improvements in employment income have not reversed that trend These alternative livelihood strategies should therefore be considered as a normal part of urban life and supported with state resources that can improve access to food for the most marginalized groups The Despot's Accomplice Brian Klaas,2018-05-01 For the first time since the end of the Cold War the world is steadily becoming less democratic The true culprits are dictators and counterfeit democrats But argues Klaas the West is also an accomplice inadvertently assaulting pro democracy forces abroad as governments in Washington London and Brussels chase pyrrhic short term economic and security victories Friendly fire from Western democracies against democracy abroad is too high a price to pay for a myopic foreign policy that is ultimately making the world less prosperous stable and democratic The Despot's Accomplice draws on years of extensive interviews on the frontlines of the global struggle for democracy from a poetry reading politician kidnapping general in Madagascar to Islamist torture victims in Tunisia Belarusian opposition activists tailed by the KGB West African rebels and tea sipping members of the Thai junta Cumulatively their stories weave together a tale of a broken system at the root of democracy's global retreat **Disaster Risks and Hazards** Rosemary

Kasimba,Innocent Chirisa,2025-07-18 This book discusses disaster risks and hazards as well as measures to increase people's resilience The 21st Century has experienced a number of disasters that resulted in hampering socio economic development the loss of lives and property hence they are a threat to sustainable development Disaster risk management efforts and practices have failed to arrest the underlying drivers of increased global risk No country is immune to disaster risk thus resilience has become a critical component of disaster management It provides an opportunity to confront the social ecological foundations of disasters However it has been vaguely conceptualised and lacks a concrete approach to operationalization Some developing countries are gradually coming to realise that preparedness hazard mapping prediction risk and vulnerability assessment and planning are critical for increasing resilience and reducing losses following disasters A paradigm shift is required from reactionary to proactive measures in disaster management as the latter focuses more on increasing the resilience of the community Zimbabwe's disaster management policy of 1979 is in the process of review following Cyclone Idai in March 2019 and the Corona Virus 19 COVID 19 Furthermore the consequences of climate change disaster are being felt with across the world particularly developing countries whose preparatory measures for such disasters are inadequate Disasters have become inevitable and no country is every country is vulnerable to them In the event of these disasters the vulnerable people are at risk and are affected more as majority of them are not able to cope In developed countries measures are in place to assist the vulnerable in the event that a disaster strikes However Zimbabwe being a developing country is not able to deal with unpredictable disasters due to lack of resources hence the need for it to adopt mitigatory and transformative measures to reduce the impact of any form of disasters African Transnational Diasporas D.

Khanyile Mlotshwa, Mphathisi Ndlovu, 2022-06-01 The Idea of Matabeleland in Digital Spaces Genealogies Discourses and Epistemic Struggles establishes a debate and dialogue between critical and post de colonial approaches in the study of subalternity in online media representations Editors Khanyile Mlotshwa and Mphathisi Ndlovu curate chapters that deal specifically with the intersectional subalternity of Matabeleland a political and geographical region in the Southwest part of Zimbabwe comprising of three provinces Matabeleland South Matabeleland North and Bulawayo metropolitan province The subalternity of this region emerges in politics and popular culture including media as intersectional in terms of ethnicity region gender class and beyond This book argues that in online spaces the liberatory politics of Matabeleland emerges as trapped in coloniality      **The Delusion of Knowledge Transfer** Susanne Koch, Peter Weingart, 2016-12-13 With the rise of the knowledge for development paradigm expert advice has become a prime instrument of foreign aid At the same time it has been object of repeated criticism the chronic failure of technical assistance a notion under which advice is commonly subsumed has been documented in a host of studies Nonetheless international organisations continue to send advisors promising to increase the effectiveness of expert support if their technocratic recommendations are taken up This book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation Based on empirical evidence from South Africa and Tanzania the authors show that aid related advisory processes are inevitably obstructed by colliding interests political pressures and hierarchical relations that impede knowledge transfer and mutual learning As a result recipient governments find themselves caught in a perpetual cycle of dependency continuously advised by experts who convey the shifting paradigms and agendas of their respective donor governments For young democracies the persistent presence of external actors is hazardous ultimately it poses a threat to the legitimacy of their governments if their policy making becomes more responsive to foreign demands than to the preferences and needs of their citizens      **The Delusion of Knowledge Transfer** Susanne Koch, Peter

Weingart, 2016-12-13 With the rise of the knowledge for development paradigm expert advice has become a prime instrument of foreign aid At the same time it has been object of repeated criticism the chronic failure of technical assistance a notion under which advice is commonly subsumed has been documented in a host of studies Nonetheless international organisations continue to send advisors promising to increase the effectiveness of expert support if their technocratic recommendations are taken up This book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation Based on empirical evidence from South Africa and Tanzania the

authors show that aid related advisory processes are inevitably obstructed by colliding interests political pressures and hierarchical relations that impede knowledge transfer and mutual learning As a result recipient governments find themselves caught in a perpetual cycle of dependency continuously advised by experts who convey the shifting paradigms and agendas of their respective donor governments For young democracies the persistent presence of external actors is hazardous ultimately it poses a threat to the legitimacy of their governments if their policy making becomes more responsive to foreign demands than to the preferences and needs of their citizens

**The Water Legacies of Conventional Mining** James E.

Nickum,David B. Brooks,Anthony Turton,Surina Esterhuyse,2018-10-15 The impact of mining is too big to ignore in a world of oversubscribed water This is true of conventional mining as much as or even more than hydraulic fracturing fracking The legacy issues of such mining on water have not been fully appreciated especially the irretrievable effects mining has had on

communities and ecosystems around the world through its impact on water Yet this is not an us or them problem the wealth influence and technical knowledge of mining interests can and must be part of the solution All of the contributions to this volume either consider the deficiencies of existing governance structures and the need for better ones or explore the use of new techniques to identify and evaluate social and environmental impacts The chapters in this book were originally published in the journal Water International
