General information, VCADS Pro

VCADS Pro is a software package used to test, calibrate and program control units in trucks and buses. There is also a function that allows results to be saved on job cards. VCADS Pro operates under Windows 95.

VCADS Pro Test and Calibration is used to carry out tests and calibrations on vehicles using the Multiplex electrical system. Tests can also be performed on vehicles using conventional electronic systems. The tests and the calibrations in VCADS Pro are organised according to function group and comprise a number of standard components. There are standard components

for graph presentations and continuous reading of parameters for example.

VCADS Pro Programming can be used to program control units with D12A and EDC Multiplex electronic control systems. The parameters in the ECUs can usually be programmed locally. However some parameters require connection to the Vehicle Data Administration database (VDA) at Volvo.

Various parts of VCADS Pro can be accessed depending on training, market situations, etc.
