The Importance of Species Peter Kareiva, Simon A. Levin, 2015-01-22 A great many species are threatened by the expanding human population Though the public generally

favors environmental protection conservation does not come without sacrifice and cost Many decision makers wonder if every species is worth the trouble Of what consequence would the extinction of say spotted owls or snail darters be Are some species expendable Given the reality of limited money for conservation efforts there is a compelling need for scientists to help conservation practitioners set priorities and identify species most in need of urgent attention Ecology should be capable of providing guidance that goes beyond the obvious impulse to protect economically valuable species salmon or aesthetically appealing ones snow leopards Although some recent books have considered the ecosystem services provided by biodiversity as an aggregate property this is the first to focus on the value of particular species It provides the scientific approaches and analyses available for asking what we can expect from losing or gaining species The contributors are outstanding ecologists theoreticians and evolutionary biologists who gathered for a symposium honoring Robert T Paine the community ecologist who experimentally demonstrated that a single predator species can act as a keystone species whose removal dramatically alters entire ecosystem communities They build on Paine s work here by exploring whether we can identify species that play key roles in ecosystems before they are lost forever These are some of our finest ecologists asking some of our hardest questions They are in addition to the editors S E B Abella G C Chang D Doak A L Downing W T Edmondson A S Flecker M J Ford C D G Harley E G Leigh Jr S Lubetkin S M Louda M Marvier P McElhany B A Menge W F Morris S Naeem S R Palumbi A G Power T A Rand R B Root M Ruckelshaus J Ruesink D E Schindler T W Schoener D Simberloff D A Spiller M J Wonham and J T Wootton

Using Methods in the Field Victor C. de Munck, Elisa J. Sobo, 1998-08-24 Methods textbooks generally offer prescriptive advice on how to perform certain techniques how to develop specific strategies how to analyze your results But as all experienced ethnographers know this fine sounding advice rarely provides ample guidance in dealing with real people in real field settings That is where this casebook differs Selecting many key methods regularly used by anthropologists participant observation consensus analysis simple surveys scaling freelist and triads networks decision modeling the editors commissioned scholars who have completed studies using these techniques to describe them in the context of real field work Using cases from health community politics family relations and child development among others in settings as diverse as an Arkansas college campus a Mexican barrio a Thai village and a Scottish business the student is given a clear understanding of the diversity of methods used by anthropologists and the complexities surrounding their use
