*Transactions on Rough Sets IV* James F. Peters, 2005-11-15 Volume IV of the Transactions on Rough Sets TRS introduces a number of new advances in the theory and application of rough sets. Rough sets and approximations spaces were introduced more than 30 years ago by Zdzisław Pawlak. These advances have profound implications in a number of research areas such as the foundations of rough sets, approximate reasoning, artificial intelligence, bioinformatics, computational intelligence, cognitive science, intelligent systems, data mining, machine intelligence, and security. In addition, it is evident from the papers included in this volume that the foundations and applications of rough sets is a very active research area worldwide. A total of 16 researchers from 7 countries are represented in this volume, namely Canada, India, Norway, Sweden, Poland, Russia, and the United States of America. Evidence of the vigor, breadth, and depth of research in the theory and applications of rough sets can be found in the 10 articles in this volume. Prof. Pawlak has contributed a treatise on the philosophical underpinnings of rough sets. In this treatise, observations are made about the Cantor notion of a set, antinomies arising from Cantor sets, the problem of vagueness, especially vague/imprecise concepts, fuzzy sets, rough sets, fuzzy vs. rough sets, as well as logic and rough sets. Among the many vistas and research directions suggested by Prof. Pawlak, one of the most fruitful concerns the model for a rough membership function, which was incarnated in many different forms since its introduction by Pawlak and Skowron in 1994. Recall here that Prof. Supervised and Unsupervised Ensemble Methods and their Applications Oleg Okun, 2008-04-18. This book results from the workshop on Supervised and Unsupervised Ensemble Methods and their Applications, briefly SUEMA, in June 2007 in Girona, Spain. This workshop was held alongside the 3rd Iberian Conference on Pattern Recognition and Image Analysis. *Information Retrieval Technology* Pu-Jen Cheng, Min-Yen Kan, Wai Lam, Preslav Nakov, 2010-12-06. The Asia Information Retrieval Societies Conference AIRS 2010 was the sixth conference in the AIRS series, aiming to bring together international researchers and developers to exchange new ideas and the latest results in information retrieval. The scope of the conference encompassed the theory and practice of all aspects of information retrieval in text, audio, image, video, and multimedia data. AIRS 2010 continued the conference series that grew from the Information Retrieval with Asian Languages IRAL workshop series, started in 1996. It has become a mature venue for information retrieval work, finding support from the ACM Special Interest Group on Information Retrieval (SIGIR), the Association for Computational Linguistics and Chinese Language Processing (ACLCLP), ROCLING, and the Information Processing Society of Japan Special Interest Group on Information Fundamentals and Access Technologies (IPSJSIG-IFAT). This year saw a sharp rise in the number of submissions over the previous year. A total of 120 papers were submitted, representing work by academics and practitioners not only from Asia but also from Australia, Europe, North America, etc. The high quality of the work made it difficult for the dedicated program committee to decide which papers to feature at the conference. Through a double-blind reviewing process, 26 submissions (21%) were accepted as full oral papers, and 31 (25%) were accepted as short posters. The

success of this conference was only possible with the support of all of the authors who submitted papers for review the  
 programme committee members who constructively assessed the submissions and the registered conference delegates We thank  
 them for their support of this conference and for their long term support of this Asian centric venue for IR research and  
 development **Familiae minorum gentium** Joseph Hunter, 1894 **FM 2009: Formal Methods** Ana Cavalcanti, Dennis  
 Dams, 2009-11-04 th FM 2009 the 16 International Symposium on Formal Methods marked the 10th anniversary of the First  
 World Congress on Formal Methods that was held in 1999 in Toulouse France We wished to celebrate this by advertising and  
 organizing FM 2009 as the Second World Congress in the FM series aiming to once again bring together the formal methods  
 communities from all over the world The statistics displayed in the table on the next page include the number of countries  
 represented by the Programme Committee members as well as of the authors of submitted and accepted papers Novel this  
 year was a special track on tools and industrial applications Submissions of papers on these topics were especially encouraged  
 but not given any special treatment It was just as hard to get a special track paper accepted as any other paper What we did  
 promote however was a discussion of how originality contribution and soundness should be judged for these papers The  
 following questions were used by our Programme Committee Artificial Intelligence Research and Development Beatriz  
 López, 2005 The field covered by Artificial Intelligence AI is multiform and gathers subjects as various as the engineering of  
 knowledge the automatic treatment of the language the training and the systems multiagents and more This book focuses on  
 subjects including Machine Learning Reasoning Neural Networks Computer Vision and Multiagent Systems *Machine*  
*Learning: ECML-94* Francesco Bergadano, 1994-03-22 This volume contains the proceedings of the European Conference on  
 Machine Learning 1994 which continues the tradition of earlier meetings and which is a major forum for the presentation of  
 the latest and most significant results in machine learning Machine learning is one of the most important subfields of  
 artificial intelligence and computer science as it is concerned with the automation of learning processes This volume contains  
 two invited papers 19 regular papers and 25 short papers carefully reviewed and selected from in total 88 submissions The  
 papers describe techniques algorithms implementations and experiments in the area of machine learning **The**

 Formality is becoming accepted as essential in the development of complex systems such as multi layer communications  
 protocols and distributed systems Formality is mandatory for mathematical verification a procedure being imposed on safety  
 critical system development Standard documents are also becoming increasingly formalised in order to capture notions  
 precisely and unambiguously This FORTE 91 proceedings volume has focussed on the standardised languages SDL Estelle  
 and LOTOS while as with earlier conferences remaining open to other notations and techniques thus encouraging the  
 continuous evolution of formal techniques This useful volume contains 29 submitted papers three invited papers four industry  
 reports and four tool reports organised to correspond with the conference sessions Mathematical Approaches to Software
