**Vector Mechanics for Engineers** Ferdinand Pierre Beer, Elliot R. Eisenberg, Elwood Russell Johnston, 2007 The first objective of a first course in mechanics should be to develop in the engineering student the ability to analyze any problem in a simple and logical manner and to apply to its solution a few well understood basic principles It is hoped that this text designed for the first course in statics offered in the sophomore year will help the instructor achieve this goal Pref

Russell Johnston, Jr., Ferdinand P. Beer, David Mazurek, 2018-01-29 A primary objective in a first course in mechanics is to help develop a student's ability first to analyze problems in a simple and logical manner and then to apply basic principles to their solutions A strong conceptual understanding of these basic mechanics principles is essential for successfully solving mechanics problems This edition of Vector Mechanics for Engineers will help instructors achieve these goals Continuing in the spirit of its successful previous editions this edition provides conceptually accurate and thorough coverage together with a significant refreshment of the exercise sets and online delivery of homework problems to your students The 12th edition has new case studies and enhancements in the text and in Connect The hallmark of the Beer Johnston series has been the problem sets This edition is no different Over 650 of the homework problems in the text are new or revised One of the characteristics of the approach used in this book is that mechanics of particles is clearly separated from the mechanics of rigid bodies This approach makes it possible to consider simple practical applications at an early stage and to postpone the introduction of the more difficult concepts Additionally Connect has over 100 Free Body Diagram Tool Problems and Process Oriented Problems McGraw Hill Education's Connect is also available Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need when they need it how they need it so that class time is more effective Connect

allows the professor to assign homework quizzes and tests easily and automatically grades and records the scores of the student's work. Problems are randomized to prevent sharing of answers and may also have a multi-step solution which helps move the students' learning along if they experience difficulty.
