Hoffmann describes current research toward a hydrogen based economy He presents the history of hydrogen energy and discusses the environmental dangers of continued dependence on fossil fuels Hydrogen is not an energy source but a carrier that like electricity must be manufactured Today hydrogen is manufactured by decarbonizing fossil fuels In the future it will be derived from water and solar energy and perhaps from cleaner versions of nuclear energy Because it can be made by a variety of methods Hoffmann argues it can be easily adapted by different countries and economies Hoffmann acknowledges the social political and economic difficulties in replacing current energy systems with an entirely new one Although the process of converting to a hydrogen based economy would be complex he demonstrates that the environmental and health benefits would far outweigh the costs [The Scooter Bible](#) Eric Dregni,2022-06-21
