Cookies Deluxe sells packages of cookies in different sizes. Size 1 is just a jar of cookies, size 2 is a jar of cookies and a box of cookies, size 3 is a jar of cookies and 2 boxes of cookies and so on.

The jar of cookies has 7 cookies in it, and each box has 6 cookies in them. The table shows the number of cookies for each size.

Size of package	1	2	3	4	5
Number of cookies	7	13			

1.) Fill in the table to show how many cookies in size 3, 4, and 5.

2.) The biggest size Cookies Deluxe sells is size 10. How many cookies would size 10 contain? Show how you figured that out.

3.) Derrick says he bought his sons a size that contained 70 cookies. Can Derrick be correct? Explain how you know.

4.) The factory where the cookies are made needs a rule for the number of cookies in any size package so that it can use it in its computer. Write an expression for the number of cookies in a size n package.

Research in Education ,1972-05 **Get Out Now** Mary Rice Hasson,Theresa Farnan,2018-08-14 Should we stay or should we go Millions of parents with children in public schools can t believe they re asking this question But they are And you should be asking it too Almost overnight America s public schools have become morally toxic And they are especially poisonous for the hearts and minds of children from religious families of every faith ordinary families who value traditional morality and plain old common sense Parents first duty is to their children to their intellect their character their souls The facts on the ground point to one conclusion get out now

What Mathematics Do Students Know and How is that Knowledge Changing? Peter Kloosterman,Doris Mohr,Crystal Walcott,2015-09-01 This volume is intended for researchers curriculum developers policy makers and classroom teachers who want comprehensive information on what students at grades 4 8 and 12 the grades assessed by NAEP can and cannot do in mathematics After two introductory chapters on the design of NAEP the volume contains a chapter on the challenges in analyzing NAEP data at the item level followed by five chapters that report 2005 through 2013 student performance on specific assessment items These chapters are organized by content area and then by topic e g understanding of place value knowledge of transformations ability to use metric and U S systems of measurement and thus provide baseline data on the proportion of students who are able to complete the mathematics tasks currently used in the upper elementary middle and high school mathematics curriculum Additional chapters focus on student reasoning U S performance on international assessments and using construct analysis rather than percent correct on clusters of items to understand student knowledge on specific mathematics topics Several themes emerge from the volume One is that while the rate of improvement in mathematics learning in grades 4 and 8 has slowed in recent years it has slowed more on some topics than others Another is that relatively minor changes in wording can have significant effects on student performance and thus it is difficult to be specific about what students can do without

knowing exactly what questions they were asked A third theme is that changes in performance over time can sometimes but not always be understood in terms of what students are taught For example there were substantial gains on several grade 4 items requiring understanding of fractions and that is probably because the amount of instruction on fractions in grades 3 and 4 has been increasing In contrast while relatively few twelfth grade students have ever been good at factoring trinomials performance on this skill seems to be decreasing This suggests that while more students are completing advanced mathematics courses in high school these courses are not helping in the area of factoring trinomials Finally there are limitations to using NAEP as a measure of student performance on the Common Core State Standards To the extent that NAEP can be used however the NAEP data show a substantial gap between expectations and performance Resources in Education ,1997 **Resources in Vocational Education** ,1978
