Phil Edmonston's Lemon-aid Used Cars and Minivans Louis-Philippe Edmonston, 2004 *The Electric Vehicle* Gijs Mom, 2013-02-15 Winner of the Engineer Historian Award from the International History and Heritage Committee of the American Society of Mechanical Engineers and the Nicholas Joseph Cugnot Award given by the Society of Automotive Historians Recent attention to hybrid cars that run on both gasoline and electric batteries has made the electric car an apparent alternative to the internal combustion engine and its attendant environmental costs and geopolitical implications Few people realize that the electric car neither a recent invention nor a historical curiosity has a story as old as that of the gasoline powered automobile and that at one time many in the nascent automobile industry believed battery powered engines would become the dominant technology In both Europe and America electric cars and trucks succeeded in meeting the needs of a wide range of consumers Before World War II as many as 30 000 electric cars and more than 10 000 electric trucks plied American roads European cities were busy with electrically propelled fire engines taxis delivery vans buses heavy trucks and private cars Even so throughout the century long history of electric propulsion the widespread conviction it was an inferior technology remained stubbornly in place an assumption mirrored in popular and scholarly memory In *The Electric Vehicle* Gijs Mom challenges this view arguing that at the beginning of the automobile age neither the internal combustion engine nor the battery powered vehicle enjoyed a clear advantage He explores the technology and marketing consumer ratio faction relationship over four generations of electric vehicle design with separate chapters on privately owned passenger cars and commercial vehicles Mom makes comparisons among European countries and between Europe and America He finds that the electric vehicle offered many advantages among them greater reliability and control less noise

and pollution He also argues that a nexus of factors cultural underpowered and less rugged electric cars seemed feminine at a time when most car buyers were men structural the shortcomings of battery technology at the time and systemic the infrastructural problems of changing large numbers of batteries ultimately gave an edge to the internal combustion engine One hopes as a new generation of electric vehicles becomes a reality The Electric Vehicle offers a long overdue reassessment of the place of this technology in the history of street transportation *Ward's Auto World* ,1998 **New Cars Prices and Reviews** Edmund's Staff,1999-11 This buyer s guide presents MSRP and dealer invoice prices and reviews for new cars and includes standard and optional equipment specifications and reviews and buying and leasing advice A toll free car buying service is also offered AAA Autograph American Automobile Association,1999 Convenient and reliable AAA AutoGraph contains easy to use evaluations of more than 180 foreign and domestic models of minivans cars sport utilities and pickups The guide covers the strong and weak points for each listing suggests retail prices from various manufacturers and gives tips on negotiating the best deal 500 photos **Annual Index/abstracts of SAE Technical Papers** ,1999 Consumers' Research Magazine ,1999 Design News ,1998 **Consumers Index to Product Evaluations and Information Sources** ,1999 Car and Driver ,2001 **Automotive News** , Lemon-Aid Car Guide 2001 Phil Edmonston,2001 A guide to buying a used car or minivan features information on the strengths and weaknesses of each model a safety summary recalls warranties and service tips
