### COMPACT EXCAVATOR EC45

#### Even more efficient !

Like all Volvo machines, the  
EC45 develops an impressive  
level of performance.  
The bucket force and dig-  
ging depth are amongst the  
best on the market to give  
you improved productivity  
on all your sites.

#### Excellent equipment performance

The bucket has a new large range  
of movements (new ISOPE). This  
characteristic guarantees a good attack  
and great resistance at all depths.

#### Long chassis for more stability

The considerable length of the  
track provides exceptional stability  
and allows more impact and stress  
while working ground pressure.

#### Valve quick coupling

The exclusive Volvo quick coupling  
enables an accessory to be locked to the  
bucket quickly without losing the  
operator's safe working area for other  
mechanical or hydraulic.

#### Compact rear impact protection

The new compact dimensions of the  
Volvo machine enable them to  
work safely in the narrowest sites.  
The reinforced shape of the counter-  
weight protects the machine with  
excellent protection against all impacts.

#### Locking of the offset arm

The offset arm is equipped with a  
locking valve which blocks the arm  
and prevents it from sliding. The  
result: the boom's effort is totally lost in  
the position chosen by the operator  
even during long and difficult work.

#### Load-lowering system

operator has a compact excavator  
boom as easy to operate.

Boom movements independent of  
movement - the hydraulic  
load-lowering system fixed to the EC45  
machine represents the best available  
technology.

#### The boom effort for working obliquely a wall

The hydraulic effort of the boom  
enables it possible to reduce the  
overall dimensions of the excavator  
and to work obliquely a wall.
