191/221/243/272 kW (260/301/330/370 hp) crankshaft power acc. to ISO 8665

## A revolutionary marine propulsion system

There is an ever-increasing demand for higher speed, improved handling, enhanced onboard comfort and reduced emissions. Buyers of patrol boats, police boats, fast fishing boats and other workboats with traditional inboard propulsion want speeds well above 30 knots. But this is where the efficiency of conventional shaft installations really starts to drop.

Something new is required to combine performance for driving pleasure, onboard comfort and reliability with good environmental properties.

### Overview

The Volvo Penta IPS propulsion system is now available in four versions for commercial applications ranging from 350 to 500 hp performance level, suitable for approx. 30 up to 45 feet planing hulls.

Volvo Penta IPS is setting a new standard:

- Much improved efficiency, higher top speed, reduced fuel consumption/extended range, and great acceleration
- Low-speed maneuvering is easier than ever before, and high speed handling is an easy task
- Onboard comfort is greatly enhanced thanks to much lower levels of sound and vibrations
- Installation is greatly simplified
- More space available for cargo
- Improved safety and quality
- Ease of service, and a complete system supported by one supplier
- Improved overall environmental care

All this is combined with the usual benefits of a traditional inboard such as a robust, high strength construction, excellent corrosion resistance and the propellers under the hull.

### Efficiency and performance

Around 30 knots, the conventional propeller shaft system starts to lose efficiency (see the lower curve in below diagram). Low efficiency means that more installed power is needed, which, in turn, results in increased fuel consumption, reduced cruising range and more exhaust emissions.

The Volvo Penta IPS offers a revolutionary solution to this, with outstanding efficiency over the whole speed range 25–45 knots (see the upper curve in below diagram).

Volvo Penta IPS has as much as 35% better efficiency at 38 knots. This means that engine power is transmitted much more efficiently into the water resulting in:

- Increased speed
- Reduced fuel consumption
- Faster acceleration
- Less emissions per nautical mile

In a comparison between two identical boats with the same installed diesel power we have achieved 6 knots faster top speed with Volvo Penta IPS, a reduced fuel consumption at 30 knots cruise by approx. 30%, and, finally, an improved acceleration by 15% quicker out of the hole.

Because of this superior efficiency, the product designations 350/400MC/450/500 communicate performance level compared to a conventional shaft installation.
