Mandatory Sustainability Requirements in EU Public Procurement Law Willem Janssen, Roberto Caranta, 2023-10-05 This book provides the first comprehensive appraisal of the paradigm shift towards mandatory sustainability requirements in EU public procurement law. Traditionally EU public procurement law focused on how to buy dictating procedural rules so that public buyers in the Member States did not discriminate against suppliers and service providers from other Member States. Mandatory green and social requirements mean that with a view to achieving sustainable development goals and mitigating climate change the EU will limit this discretionary power for public buyers pushing them to acquire more sustainable goods and services. Based on legal analysis informed by economic perspectives the book aims to contribute to an understanding and critical discussion of the EU legislator's move towards regulating what to buy. The book discusses the role of the Public Procurement Directives in relation to this paradigm shift as well as various other sectoral legislative instruments that have been revamped or newly introduced in light of the European Green Deal. The paradigm shift is analysed from different perspectives including subsidiarity, alternative regulation, economics and public purchasing. The book includes novel sectoral studies on transport, food, clothing and construction, discussing how change is taking place and what its major challenges are for the future. Chapters on Italy, the Netherlands, Spain and more offer case studies of Member States that have already introduced mandatory requirements and highlight lessons learnt. This is an essential book for professionals working with public procurement law in academia and practice and to those engaged in achieving public policy objectives in light of climate change and social injustice. Sustainable Public Procurement under EU Law Beate Sjøfjell, Anja

Wiesbrock, 2015-12-03 This book examines the effectiveness of the modernisation of EU public procurement law in light of the overarching treaty goals on sustainability. Contributors expertly cover core issues of public procurement including life cycle costing, LCC, eco and fairtrade labels, the link to the subject matter, LfSM requirement, the mandatory horizontal rule on environmental and social legal compliance and framework agreements. Also explored are the balancing of economic and non-economic objectives implied in sustainable public procurement. The volume moves on to identify major unresolved issues in the use of sustainability considerations and highlights challenges and possibilities for the national implementation due to take place in 2016. The book contributes to the dismantling of the compartmentalisation that underpins unsustainable policy decisions by discussing the interface of company law and public procurement law and the implication of the new rules on sustainable public procurement for sustainable companies and specifically for small and medium-sized enterprises (SMEs).

A Practical Guide to Public Procurement Abby Semple, 2015 A guide to the EU legislation which governs the award of public contracts in all 28 EU countries. **Cost and EU Public Procurement Law** Marta Andhov, Roberto Caranta, Anja

Wiesbrock,2019-09-19 Public institutions companies and governments in the EU and around the world are increasingly engaging in sustainable public procurement a broad concept that must consider the three pillars of economic equality social welfare and public health and environmental responsibility when designing public tenders and finalizing government contracts This book contributes to the development of life cycle criteria tools and methodologies for public procurement in the EU It collects both sector crossing contributions analysing the most relevant theoretical and legal aspects including both EU law and contract theory and sector specific contributions relating to some of the most important sustainable goods and services markets The book starts with a chapter that discusses the different approaches to including sustainability considerations in buying decisions by both private and public purchasers and then goes on to examine the EU law on LCC and how it is implemented in different Member States These chapters address the challenges in balancing economic and sustainability objectives under EU internal market law One chapter develops the analysis with specific reference to public private partnership Another chapter elaborates how multi stakeholders cooperation is necessary to develop LCC based on a case study of a lighting services procurement Three sector specific studies relating to social housing textile and clothing and IT close the book With contributors from a range of backgrounds including law business management engineering and policy development this interdisciplinary book provides the first comprehensive study on LCC within the framework of EU public procurement law

Sustainable Public Procurement Anastasia O'Rourke,2013 With governments responsible for significant portions of national spending the promise of including sustainability considerations into that spending can enable policy makers to lead by example with sustainable public procurement SPP The report examines the state of sustainable public procurement policies and practices being undertaken by national governments worldwide in the last five years The research included a comprehensive literature and desktop review 19 interviews six country case studies and a survey of 273 SPP experts worldwide The objective was to create a baseline analysis that examines the evolving field of SPP and the drivers barriers needs and opportunities in SPP

Sustainability in Public Procurement, Corporate Law and Higher Education Lela Melon,2023-12-12 Contemporary changes in law and policy at the global level to efficiently answer to environmental and social issues correspond to the traditional approach of limiting the regulatory and policy changes to a singular field or discipline tackling the inherent unsustainability of corporate laws or incentivising the offering of sustainable finance to stimulate the transition towards sustainable practices This book provides a new viewpoint and approach of simultaneously regulating seemingly non connected fields in order to provide a fertile ground for a truly organic change towards sustainable outcomes It addresses diverse questions of sustainable transition of the three specific fields to support sustainable practices in public procurement private market transaction and in educating future business leaders and legal experts by incorporating sustainable concerns as the underlying guiding principles of their conduct It translates scientific findings into a practical format that can be used by diverse stakeholders searching for information and solutions in their respective professional fields

The underlying assumption is that a simultaneous action in the three respective fields of public procurement corporate law and higher education brings about more coherent and interconnected results that incentivise further action and changes towards sustainable practices The book furthers the idea of policy coherence by building upon the findings in the field of public procurement corporate law and practice and higher education curricula By identifying the barriers in the three respective fields for sustainable action and proposing solutions for either eliminating or minimising those barriers at the EU level the book calls for further changes in the respective fields as well as for considering the spillover effects of these policies on other fields
