contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume **All**

Rott, 2012-12-06 Phenomena as diverse as tuberculin sensitivity delayed sensitivity to soluble proteins other than tuberculin contact allergy homograft rejection experimental autoallergies and the response to many microorganisms have been classified as members of the class of immune reactions known as delayed or cellular

hypersensitivity Similarities in time course histology and absence of detectable circulating immunoglobulins characterize these cell mediated immune reactions in vivo The state of delayed or cellular hypersensitivity can be transferred from one animal to another by means of sensitized living lymphoid cells CHASE 1945 LANDSTEINER and CHASE 1942 MITCHISON

1954 The responsible cell has been described by GOWANS 1965 as a small lymphocyte Passive transfer has also been achieved in the human with extracts of sensitized cells LAWRENCE 1959 The in vivo characteristic of delayed

hypersensitivity from which the class derives its name is the delayed skin reaction When an antigen is injected intradermally into a previously immunized animal the typical delayed reaction begins to appear after 4 hours reaches a peak at 24 hours and fades after 48 hours It is grossly characterized by induration erythema and occasionally necrosis The histology of the

delayed reaction has been studied by numerous investigators COHEN et al 1967 GELL and HINDE 1951 KOSUNEN 1966 KOSUNEN et al 1963 MCCLUSKEY et al 1963 WAKSMAN 1960 WAKSMAN 1962 Initially dilatation of the capillaries with exudation of fluid and cells occurs **Boating**, 2007-03 **Proteinase Inhibitors** H. Inhibitors The cordial atmosphere the frank discussions and the profitable exchange of ideas during the First International Research Conference on Proteinase Inhibitors which was held on November 4 6 1970 in Munich were a stimulant for us to consider holding a Second Conference especially as the steadily increasing research activities in this and related fields called for a new assessment of recent efforts in proteinase inhibitor research In the three years since the First Conference was held this field has developed particularly in the areas of molecular aspects of protein protein interactions and in the extension to inhibitors of nonserine proteinases and peptidases In planning this meeting the Organizing Committee was faced with the problem of selecting a limited number of participants and we decided that it was appropriate and necessary to focus in detail on the chemistry of proteinase inhibitors their interactions with a variety of enzymes and also to invite more general papers to survey the physiological and clinical aspects of the subject which we felt would be of importance in the future Suzuki Suzuki, Motor Co.
