Gonnerman organized a yearlong research workshop on Gary Snyder's Mountains and Rivers Without End at the Stanford Humanities Center. Members of what came to be known among faculty students and diverse community members as the Mountains Rivers Workshop met regularly to read and discuss Snyder's epic poem. Here the poem served as a commons that turned the multiversity into a university once again if only for a moment. The Workshop invited writers, teachers, and scholars from Northern California and Japan to speak on various aspects of Snyder's great accomplishment. This book captures the excitement of these gatherings and invites readers to enter the poem through essays and talks by David Abram, Wendell Berry, Carl Bielefeldt, Tim Dean, Jim Dodge, Robert Hass, Stephanie Kaza, Julia Martin, Michael McClure, Nanao Sakaki, and Katsunori Yamazato. It includes an interview with Gary Snyder, appendices, and other resources for further study. Snyder once introduced a reading of this work with reference to whitewater rapids, saying most of his writing is like a Class III run where you will do just fine on your own but that Mountains and Rivers is more like Class V if you're going to make it to take out; you need a guide. As a collection of commentaries and background readings, this companion volume enhances each reader's ability to find their way into and through an adventurous and engaging work of art.

**Meditation** Deane H. Shapiro (Jr.), Roger N. Walsh, Many claim that meditation is effective in the treatment of many ailments associated with stress and high blood pressure and in the management of pain. While there are many popular books on meditation, few embrace the science as well as the art of meditation. In this volume, Shapiro and Walsh fill this need by assembling a complete collection of scholarly articles. *Meditation: Classic and Contemporary Perspectives* From an academic rather than a popular vantage, the volume takes the claims and counterclaims about meditation to a deeper analytical level by including studies from clinical psychology and psychiatry, neuroscience, psychophysiology, and biochemistry. Each selection is a contribution to the field, either as a classic of research or by being methodologically elegant, heuristically interesting, or creative. Original articles cover such topics as the effects of meditation in the treatment of stress, hypertension, and addictions; the comparison of meditation with other self-regulation strategies; the adverse effects of meditation; and meditation-induced altered states of consciousness. Concluding with a major bibliography of related works, *Meditation* offers the reader a valuable overview of the state and possible future directions of meditation research. Today, in the popular media and elsewhere, debate continues: Is meditation an effective technique for spiritual and physical healing, or is it quackery? *Meditation: Classic and Contemporary Perspectives* weighs in on this debate by presenting what continues to be the most complete collection of scholarly articles ever amassed on the subject of meditation.
