Engine D98, description and operation

D98 - Tier 3 compliant

The D98 engine configuration consists of a four stroke, straight six cylinder, turbocharged, direct injected diesel engine with charge air cooling and wet, replaceable cylinder liners.

The engine has an overhead camshaft and unit injectors, which are centered above the pistons and controlled by the camshaft and a control unit (E-ECU).

The D9 uses V-ACT (Volvo Advanced Combustion Technology). The V-ACT D98 engine features a flexible high pressure fuel injection with dual solenoid injectors and optimized air handling with a fixed geometry turbocharger. Electronically controlled BGR (Internal Exhaust Gas Recirculation) reduces NO_x formation and lowers emissions without the need for exhaust after treatment. Volvo's latest engine management system, EMS2 is used to control all engine electronic functions.

The cylinders are numbered consecutively beginning at the pulley end. Engine rotational direction is counterclockwise as seen from the flywheel end.
