## Solutions to End of Chapter Problems

Farnham, *Economics for Managers*, 3/e

### Chapter 1

#### Technical Questions

1. Microeconomics focuses on the behavior of individual consumers, firms, and industries as they operate in a market economy. It analyzes how these various groups respond to changes in prices that affect their consumption, production, and selling decisions. It also describes how firms and consumers interact in various types of markets and can be used as a basis for determining competitive strategies. Macroeconomics focuses on the overall economic environment in which businesses operate. It analyzes the spending decisions of different sectors of the economy—the household, business, government, and foreign sectors. Macroeconomic policy deals with the issues of inflation, unemployment, and economic growth. Changes in the macroeconomic environment influence firms through the microeconomic issues of demand, cost, revenues, and profits.
2. Outputs are the final goods and services that firms and industries sell to consumers. Consumers create a demand for all of these goods and services. Inputs are the resources or factors of production that are used to produce the final outputs. Inputs include labor, capital, materials, and entrepreneurship. Firms' use of these inputs is related to the production of products.
