Journal of Object-oriented Programming, 1998 *Object Oriented Methods for Interoperable Scientific and Engineering Computing* Michael E. Henderson, Christopher Radcliff Anderson, Stephen L. Lyons, 1999-01-01 Contains papers presented at the October 1998 SIAM Workshop on Object Oriented Methods for Interoperable Scientific and Engineering Computing that covered a variety of topics and issues related to designing and implementing computational tools for science and engineering

A Finite Element Framework for Geotechnical Applications Based on Object-oriented Programming Peter Fritz, Xiong Zheng, 2002 ECOOP 2010 -- Object-Oriented Programming Theo D'Hondt, 2010-06-29 Annotation This book constitutes the refereed proceedings of the 24th European Conference on Object Oriented Programming ECOOP 2010 held in Maribor Slovenia in June 2010 The 24 revised full papers presented together with one extended abstract were carefully reviewed and selected from a total of 108 submissions The papers cover topics such as programming environments and tools theoretical foundations of programming languages formal methods concurrency models in Java empirical methods type systems language design and implementation concurrency abstractions and experiences *Trees in Algebra and Programming - CAAP '94* Sophie Tison, 1994-03-23 This volume contains the papers selected for presentation at the 19th Colloquium on Trees in Algebra and Programming CAAP 94 which was held jointly with the fifth European Symposium on Programming ESOP 94 in Edinburgh in April 1994 Originally this colloquium series was devoted to the algebraic and combinatorial properties of trees and their role in various fields of computer science Taking into account the evolution of computer science CAAP 94 focuses on logical algebraic and combinatorial properties of discrete structures strings trees graphs etc the topics also include applications to computer science provided that algebraic or syntactic methods are involved The volume contains 21 papers selected from 51 submissions as well as two invited papers *Theoretical Aspects of Object-oriented Programming* Carl A. Gunter, John C. Mitchell, 1994 Although the theory of object oriented programming languages is far from complete this book brings together the most important contributions to its development to date focusing in particular on how advances in type systems and semantic models can contribute to new language designs The fifteen chapters are divided into five parts Objects and Subtypes Type Inference Coherence Record Calculi and Inheritance The chapters are organized approximately in order of increasing complexity of the programming language constructs they consider beginning with variations on Pascal and Algol like languages developing the theory of illustrative record object models and concluding with research directions for building a more comprehensive theory of object oriented programming languages Part I discusses the similarities and differences between objects and algebraic style abstract data types and the fundamental concept of a subtype Parts II IV are concerned with the record model of object oriented languages Specifically these chapters discuss static and dynamic semantics of languages with simple object models that include a type or class hierarchy but do not explicitly provide what is often called dynamic binding Part V considers extensions and modifications to record object models moving closer to

the full complexity of practical object oriented languages Carl A Gunter is Professor in the Department of Computer and Information Science at the University of Pennsylvania John C Mitchell is Professor in the Department of Computer Science at Stanford University

Software Design - Cognitive Aspect Francoise Detienne, 2012-12-06

Covering a variety of areas including software analysis design coding and maintenance this text details the research conducted since the 1970s in this fast developing field before going on to define a computer program from the viewpoint of computing and cognitive psychology

The two essential sides of programming software production and software understanding are given detailed treatment with parallels drawn throughout between studies on processing texts written in natural language and processing computer programs

Of particular interest to researchers practitioners and graduates in cognitive psychology cognitive ergonomics and computer science

Distributed Computer-Aided Engineering Hojjat Adeli, Sanjay Kumar, 2020-09-23

Networking of personal computers and workstations is becoming commonplace in academic and industrial environments A cluster of workstations provides engineers with a familiar cost effective environment for high performance computing

However workstations often have no dedicated link and communicate slowly on a local area network LAN such as the Ethernet Thus to effectively harness the parallel processing or distributed computing capabilities of workstations new algorithms need to be developed with a higher computation to communication ratio

Distributed Computer Aided Engineering presents distributed algorithms for three fundamental areas finite element analysis design optimization and visualization providing a new direction in high performance structural engineering computing

Advances in Software Tools for Scientific Computing Hans P. Langtangen, Are M. Bruaset, Ewald Quak, 2012-12-06

To make full use of the ever increasing hardware capabilities of modern computers it is necessary to speedily enhance the performance and reliability of the software as well and often without having a suitable mathematical theory readily available

In the handling of more and more complex real life numerical problems in all sorts of applications a modern object oriented design and implementation of software tools has become a crucial component

The considerable challenges posed by the demand for efficient object oriented software in all areas of scientific computing make it necessary to exchange ideas and experiences from as many different sources as possible

Motivated by the success of the first meeting of this kind in Norway in 1996 we decided to organize another International Workshop on Modern Software Tools for Scientific Computing often referred to as SciTools 98

This workshop took place in Oslo Norway September 14-16 1998

The objective was again to provide an open forum for exchange and discussion of

modern state of the art software techniques applied to challenging numerical problems The organization was undertaken jointly by the research institute SINTEF Applied Mathematics the Departments of Mathematics and Informatics at the University of Oslo and the company Numerical Objects AS **Computerworld** ,1997-04-14 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Computerworld** ,2001-03-12 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Computerworld** ,2001-07-09 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network *Scientific and Technical Aerospace Reports* ,1995-05
