Melissa looked through recent orders and found five that seemed representative of those received during the past year (see Exhibit). The orders all involved cartons containing merchandise costing about \$500 to acquire from manufacturers to which the normal 22% markup had been realized. Orders requiring direct delivery had an additional 4% to 5% surcharge. Although each of these orders had been priced in the standard way for cost recovery and profit margins, Melissa wondered what profits Midwest Office Products had really earned on each of these orders.

research and the positions a researcher can occupy when trying to produce contributions associated with both theoretical and pragmatic relevance This book is based on various research projects focusing on different aspects of management accounting during the past ten years To spice up the academic debate the book also provides managerial perspectives on interventionist management accounting research with interesting new insights In addition to management accounting the ideas of interventionist research can also be applied in other management fields **Taxmann's Strategic Cost**
