Principles of Corporate Finance Law Eilís Ferran,Elizabeth Howell,Felix Steffek,2023-09-21 Corporate finance theory seeks to understand how incorporated firms address the financial constraints that affect their investment decisions This is achieved by using varied financial

instruments that seek to give holders different claims on the firm's assets. Recent scholarship in this area has highlighted the critical importance of the legal environment in explaining the choices that companies make about their capital structure. This book combines company law, capital markets law, and aspects of commercial and insolvency law to give readers a detailed understanding of the legal and regulatory issues relating to corporate finance. Informed by insights from theoretical and empirical work, the book examines from a legal perspective the key elements of corporate financing structures and capital markets in the UK. The authors' practical experience of transactions and regulatory issues ensures that thorough scholarly inquiry and critical reflection are complemented by an assured understanding of the interface between legal principles and rules as they are documented and in their actual operation. Key developments covered in this third edition include the post-Brexit adaptation of UK company law and capital market regulation, important new cases on parent company liability in tort, creditor-facing duties of directors, issuer and director liability for misleading statements to the market, alternatives to public market financing, and recent changes in the practice of debt finance such as the emergence of non-bank lenders.

Transfer Pricing Aspects of Intra-Group Financing Raffaele Petrucci, 2013-10-20 For corporate managers maximization of the profits and the market value of the firm is a prime objective The logical working out of this principle in multinational enterprises has led to an intense focus on transfer pricing between related companies principally on account of the very attractive tax advantages made possible Inevitably numerous countries have established transfer pricing legislation designed to combat the distortions and manipulations that are inherent in such transactions This important book one of the first in depth analysis of the current worldwide working of transfer pricing in intra group financing and its resonance in law presents the relevant issues related to loans financial guarantees and cash pooling analyses an innovative possible approach to these issues and describes new methodologies that can be implemented in practice in order

to make intra group financing more compliant with efficient corporate financing decisions and the generally accepted OECD arm's length principle. Comparing the tax measures implemented in the corporate tax law systems of forty countries, this study investigates such aspects of intra group financing as the following: corporate finance theories, studies and surveys regarding financing decisions; application of the arm's length principle to limit the deductibility of interest expenses; impact of the OECD's Base Erosion and Profit Shifting (BEPS) project; transfer pricing issues related to intra group financing; credit risk in corporate finance; rationales utilized by credit rating agencies; and the assessment of arm's length nature of intra group financing. The author describes ways in which the application of the arm's length principle can be strengthened and how the related risk of distortion and manipulation can be minimized. The solutions and methodologies proposed are applicable to any business sector. Given that determination of the arm's length nature of transactions between related companies is one of the most difficult tasks currently faced by taxpayers and tax administrations around the world, this thorough assessment and analysis will prove extraordinarily useful for in-house and advisory practitioners, corporate officers, academics, international organizations, and government officials charged with finding effective responses to the serious issues raised. In addition to its well-researched analysis, the book's comparative overview of how loans, financial guarantees, and cash pooling are currently addressed by OECD Member States and by their national courts is of great practical value in business decision making.

Structured Finance and Insurance Christopher L. Culp, 2011-09-13. Praise for Structured Finance Insurance: More and more each year the modern corporation must decide what risks to keep and what risks to shed to remain competitive and to maximize its value for the capital employed. Culp explains the theory and practice of risk transfer through either balance sheet mechanism such as structured finance, derivative transactions, or insurance. Equity is expensive and risk transfer is expensive. As understanding grows and as a result costs continue to fall, ART will continue to replace equity as the means to cushion knowable risks. This book enhances our understanding of ART. Myron S. Scholes, Frank E. Buck, Professor of Finance, Emeritus, Graduate School of Business, Stanford University. A must read for everyone offering structured finance as a business and arguably even more valuable to any one expected to pay for such service. Norbert Johanning, Managing Director, DaimlerChrysler Financial Services. Culp's latest book provides a comprehensive account of the most important financing and risk management innovations in both insurance and capital markets. And it does so by fitting these innovative solutions and products into a single unified theory of financial markets that integrates the once largely separate disciplines of insurance and risk management with the current theory and practice of corporate finance. Don Chew, Editor, Journal of Applied Corporate Finance, a Morgan Stanley publication. This exciting book is a comprehensive read on alternative insurance solutions available to corporations. It focuses on the real benefits, economical and practical, of alternatives such as captives, rent a captive, and mutuals. An excellent introduction to the very complex field of alternative risk transfer (ART).
