1. The first thing I noticed when I stepped out of the plane was the cold, crisp air. It felt like a blanket, warm and comforting. I had heard that the weather in the mountains was perfect, and now I knew why. The sun was shining brightly, and the birds were singing. It was a beautiful sight, and I felt like I had found a new home. I had heard that the mountains were a great place to live, and now I knew why. The air was clean, and the views were amazing. I had heard that the mountains were a great place to live, and now I knew why. The air was clean, and the views were amazing. Multi-Robot Task Allocation for Inspection Problems with Cooperative Tasks Using Hybrid Genetic Algorithms Liu, Chun, 2014 In this dissertation methods for optimal multi robot task allocation MRTA for industrial plant inspection are investigated MRTA involves distributing and scheduling a set of tasks for a group of robots to minimize the total cost taking into account operational constraints With technical progress and declining cost of robotic mobility interest in industrial mobile robotics has grown significantly in recent years Many efforts have been devoted to mobility related problems such as self localization and mapping though only few studies deal with the optimal task allocation in multi robot systems Since a good task allocation provides more efficient scheduling e g less cost shorter time the objective of this research is to develop search optimization methods for inspection problems that involve
