depression narratives and other texts encode a series of gendered messages about health and illness As depression and other forms of mental illness move from the medical professional sphere into that of the consumer public the boundary at which distress becomes disease grows ever more encompassing the need for remediation and treatment increasingly warranted Black Dogs and Blue Words demonstrates the need for rhetorical reading strategies as one response to these expanding and gendered illness definitions *The Empire of Depression* Jonathan Sadowsky, 2020-10-22 Depression has colonized the world Today more than 300 million of us have been diagnosed as depressed But 150 years ago depression referred to a mood not a sickness Does that mean people weren't sick before only sad Of course not Mental illness is a complex thing part biological part social its definition dependent on time and place But in the mid twentieth century even as European empires were crumbling new Western clinical models and treatments for mental health spread across the world In so doing depression began to displace older ideas like melancholia the Japanese *utsushi* or the Punjabi sinking heart syndrome Award winning historian Jonathan Sadowsky tells this global story chronicling the path breaking work of psychiatrists and pharmacists and the intimate sufferings of patients Revealing the continuity of human distress across time and place he shows us how different cultures have experienced intense mental anguish and how they have tried to alleviate it He reaches an unflinching conclusion the devastating effects of depression are real A number of treatments do reduce suffering but a permanent cure remains elusive Throughout the history of depression there have been overzealous promoters of particular approaches but history shows us that there is no single way to get better that works for everyone Like successful psychotherapy history can liberate us from the negative patterns of the past *The Ghost in the House* Tracy Thompson, 2024-06-11 An award winning reporter for the Washington Post Tracy Thompson was thirty four when she was hospitalized and put on suicide watch during a major depressive episode This event the culmination of more than twenty years of silent suffering became the point of departure for an in depth groundbreaking book on depression and her struggle with the disease *The Beast* shattered stereotypes and inspired countless readers to confront their own battles with mental illness Having written that book and having found the security of a happy marriage Thompson assumed that she had learned to manage her illness But when she took on one of the most emotionally demanding jobs of all being a mother depression returned with fresh vengeance Very quickly Thompson realized that virtually everything she had learned up to then about dealing with depression was now either inadequate or useless In fact maternal depression was a different beast altogether She tackled her problem head on meticulously investigating the latest scientific research and collecting the stories of nearly 400 mothers with depression What she found was startling a problem more widespread than she or any other mother struggling alone with this affliction could have imagined Women make up nearly 12 million of the 19 million Americans affected by depression every year experiencing episodes at nearly twice the rate that men do Women suffer most frequently between the ages of twenty five and forty four not coincidentally the primary childbearing years *The Ghost in the House* the

result of Thompson's extensive studies is the first book to address maternal depression as a lifelong illness that can have profound ramifications for mother and child. A striking blend of memoir and journalism, here is an invaluable resource for the millions of women who are white-knuckling their way through what should be the most satisfying years of their lives. A Deeper Shade of Blue Ruta Nonacs, 2006-08-08

Depression affects women almost twice as often as men, with about one in four women suffering from it in her lifetime. While depression may strike at any time, studies show that women are particularly vulnerable during their childbearing years. Despite the increasing awareness of this deeply concerning issue, many studies and health professionals still continue to focus almost solely on postpartum depression, ignoring the fact that depression is just as likely to affect women while they're trying to conceive and during pregnancy. Now, in this comprehensive, empathetic, and candid book, Dr. Ruta Nonacs, a senior member of the Center for Women's Mental Health at Massachusetts General Hospital and mother of two children herself, confronts the seldom-talked-about issues of pregnancy-related depression, including becoming pregnant while being treated for depression, infertility-related depression, and the effects of fertility treatments. Understanding the effects of maternal depression on spouses and family, postpartum depression, and anxiety, Nonacs also addresses the many complicated issues in a woman's life during the span of her childbearing years: education, career, marriage, childbearing, and child rearing, and discusses the ways in which depression often takes hold during potentially stressful times. Nonacs identifies many of the symptoms of depression associated with pregnancy and discusses treatments and cures, as well as ways to minimize effects of depression on family and friends. Straightforward and honest, as well as emotionally sensitive and deeply moving, *A Deeper Shade of Blue* gives every woman who has suffered from

pregnancy related depression the information she needs to get the best care for herself during pregnancy and beyond
