Foreign Agents Casey Michel, 2024-08-27 A stunning investigation and indictment of a segment of the United States foreign lobbying industry and the threat to end democracy For years one group of Americans has worked as foot soldiers for the most authoritarian regimes around the planet In the process they've not only entrenched dictatorships and spread kleptocratic networks but they've secretly guided U.S. policy without the rest of America even being aware And now some of them have begun turning their sights on American democracy itself These Americans are known as foreign lobbyists and many of them spent years ushering dictatorships directly into the halls of Washington all while laundering the reputations of the most heinous repressive regimes in the process These foreign lobbyists include figures like Ivy Lee the inventor of the public relations industry a man who whitewashed Mussolini opened doors to the Soviets and advised the Nazis on how to sway American audiences They include people like Paul Manafort who invented lobbying as we know it and who then took his talents to autocrats from Ukraine to the Philippines and then back to the White House And they now include an increasing number of Americans elsewhere in law firms and consultancies among PR specialists and former lawmakers and even within think tanks and universities In *Foreign Agents* Casey Michel shines a light on these foreign lobbyists as some of them after decades of installing dictators and corrupting American policy embark on their next mission to end America's democratic experiment once and for all

Burned by Billionaires Chuck Collins, 2025-10-07 A scathing exposé of the hidden impact of America's ultra wealthy on our social economic political and ecological landscape as well as a path toward a more equitable future The three hundred largest yachts in the world emit as much carbon dioxide as the ten million inhabitants of Burundi from *Burned by Billionaires* Recently it has become increasingly evident that extreme concentrations of wealth and power have profound impacts on our politics but extreme inequality's influence on our daily lives and our futures has been vastly overlooked In *Burned by Billionaires* author and a senior scholar at the Institute for Policy Studies in Washington DC Chuck Collins chronicles how the actions of the top 01% have severe consequences for the rest of us especially those of marginalized identities Collins takes down the myth of meritocracy unraveling how the rich rig the game in their favor resulting in a concentration of wealth in the hands of a tiny but growing class of billionaires leading to both intense income and political polarization In a wholly original argument Collins charts this economic social and ecological destruction and shows how these effects manifest in every facet of our society including Increasing the tax burden on ordinary working people Reducing public funding for schools roads and other essential infrastructure Shrinking the pool of affordable housing especially in poor and urban areas Accelerating climate change and dictating what ends up on our dinner plate Shaping the news we consume and fueling the spread of misinformation Collins argues that perhaps worst of all the concentration of wealth and power is leading to political hijacking undermining the democratic principle that our votes matter equally Full of engrossing charts graphs political cartoons and more this book is an urgent call to action and road map to a more equitable society where everyone has access to the resources that will allow them to thrive and one where it is no longer commonplace to live in a constant state of uncertainty fear and anxiety *Burned by Billionaires* offers a pointed prescription for taking power back from the billionaire class and achieving the shared prosperity that comes from a healthy and equal society

Brown, 2013 Between 1995 and 2010 millions of Americans moved between the states taking with them over 2 trillion in adjusted gross incomes Two trillion dollars is equivalent to the GDP of California the ninth largest in the world It's a lot of money Some states like Florida saw tremendous gains 86.4 billion while others like New York experienced massive losses 58.6 billion People moved and they took their working wealth with them The question is why Why did Americans move so much of their income from state to state Which states benefitted and which states suffered And why does it matter Using official statistics from the IRS *How Money Walks* explores the hows whys and impact of this massive movement of American working wealth Consider these facts Between 1995 and 2010 The nine states with no personal income taxes gained 146.2 billion in working wealth The nine states with the highest personal income tax rates lost 107.4 billion The 10 states with the lowest per capita state local tax burdens gained 69.9 billion The 10 states with the highest per capita state

local tax burdens lost 139 billion Money and people moved from high tax states to low tax ones And the tax that seemed to matter the most The personal income tax The states with no income taxes gained the greatest wealth while the states with the highest income taxes lost the most Why does this matter Because the robust presence of working wealth is the leading indicator of economic health The states that gained working wealth are growing and thriving The states that lost working wealth lost their most precious cargo their tax base and the consequences are dire stagnation deterioration an economic death spiral as they continue to raise taxes and lose people businesses and working wealth The numbers don't lie
