Rhodes Must Fall Brian Kwoba, Roseanne Chantiluke, Athinangamso Nkopo, 2018-08-15 When students at Oxford University called for a statue of Cecil Rhodes to be removed following similar calls by students in Cape Town the significance of these protests was felt across continents This was not simply about tearing down an outward symbol of British imperialism a monument glorifying a colonial conqueror but about confronting the toxic inheritance of the past and challenging the continued underrepresentation of people of colour at universities And it went to the very heart of the pernicious influence of colonialism in education today Written by key members of the movement in Oxford Rhodes Must Fall is the story of that campaign Showing the crucial importance of both

Black Power and the American People Rafael Torrubia,2016-09-14 While the history of the non violent Civil Rights Movement from Rosa Parks to Martin Luther King is one of the great American stories of the twentieth century the related Black Power movement has taken a more complex path through the nation s history Formed by a multitude of individuals the long history of the Black Power movement stretches before and beyond its political manifestations Beginning with the folk

narratives told on the plantation Black Power and the American People charts a course through the iconoclasm of the Harlem Renaissance the battleground of the American campus the struggle and skill of the Negro Leagues the drama of the boxing ring the killing fields of Vietnam and the cold concrete of the penitentiary right up to the Black Lives Matter movement of the present day Tracing these connected cultural expressions through time Black Power and the American People explores the profound legacy of Black Power from its earliest roots to its most futuristic manifestations its long history in American culture and its profound influence on the American imagination

Remembering the Past in Contemporary African American Fiction Keith Byerman, 2006-05-18 With close readings of more than twenty novels by writers including Ernest Gaines Toni Morrison Charles Johnson Gloria Naylor and John Edgar Wideman Keith Byerman examines the trend among African American novelists of the late twentieth century to write about black history rather than about their own present Employing cultural criticism and trauma theory Byerman frames these works as survivor narratives that rewrite the grand American narrative of individual achievement and the march of democracy The choice to write historical narratives he says must be understood historically These writers earned widespread recognition for their writing in the 1980s a period of African American commercial success as well as the economic decline of the black working class and an increase in black on black crime Byerman contends that a shared experience of suffering joins African American individuals in a group identity and writing about the past serves as an act of resistance against essentialist ideas of black experience shaping the cultural discourse of the present Byerman demonstrates that these novels disrupt the temptation in American society to engage history only to limit its significance or to crown successful individuals while forgetting the victims

Rethinking American History in a Global Age Thomas Bender, 2002-05-14 In rethinking and reframing the American national narrative in a wider context the contributors to this volume ask questions about both nationalism and the discipline of history itself The essays offer fresh ways of thinking about the traditional themes and periods of American history By locating the study of American history in a transnational context they examine the history of nation making and the relation of the United States to other nations and to transnational developments What is now called globalization is here placed in a historical context A cast of distinguished historians from the United States and abroad examines the historiographical implications of such a reframing and offers alternative interpretations of large questions of American history ranging from the era of European contact to democracy and reform from environmental and economic development and migration experiences to issues of nationalism and identity But the largest issue explored is basic to all histories How does one understand teach and write a national history even as one recognizes that the territorial boundaries do not fully contain that history and that within that bounded territory the society is highly differentiated marked by multiple solidarities and identities Rethinking American History in a Global Age advances an emerging but important conversation marked by divergent voices many of which are represented here The various essays explore big concepts and offer historical narratives that enrich the content and context of American

history The aim is to provide a history that more accurately reflects the dimensions of American experience and better connects the past with contemporary concerns for American identity structures of power and world presence *Vibe* ,2004
