Economic Decision Making Aurora García-Gallego,Manuel I. Ibáñez,Nikolaos Georgantzis,2017-08-22 Psychologists studying  
 cognitive processes and personality have increasingly benefited from the wealth of theory methodology and decision making  
 paradigms used in economics and game theory Similarly for the economists personality traits and basic cognitive processes  
 offer a set of coherent explanatory constructs in economic behavior Given the debate on preference invariance and  
 behavioral consistency across contexts and domains the papers in this topic shed light on the existence and effect of stable  
 sets of idiosyncratic features on economic decision making While the effects of personality and cognition on economic  
 decisions remain under explored the papers contributed in this topic offer more than a stimulus for further research The  
 general message could be that personality and cognitive processes offer the stable idiosyncratic ground on which individual  
 decisions are made *Michiganensian* ,1925
