The Brain Supremacy: Notes from the frontiers of neuroscience Kathleen Taylor, 2012-10-25 In a world full of science the balance of power between sciences is changing Advances in physics chemistry and other natural sciences have given us extraordinary control over our world Now the younger sciences of brain and mind are applying the scientific method not only to our environments but to us In recent years funding and effort poured into brain research We are entering the era of the brain supremacy What will the new science mean for us as individuals consumers parents and citizens Should we be excited or alarmed by the remarkable promises we read about in the media promises of drugs that can boost our brain power ever more subtle marketing techniques even machines that can read minds What is the neuroscience behind these claims and how do scientists look inside living human brains to get their astonishing results The Brain Supremacy is a lucid and rational guide to this exciting new world Using recent examples from the scientific literature and the media it explores the science behind the hype revealing how techniques like fMRI actually work and what claims about using them for mindreading really mean The implications of this amazingly powerful new research are clearly and entertainingly presented Looking to the future the book sets current neuroscience in its social and ethical context as an increasingly important influence on how all of us live our lives

Media Capitalism Thomas Klikauer, 2022-01-01 This book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other Firstly mass media have become indispensable to capitalism due to the media's ability to sell the commodities of mass consumerism Media capitalism also creates pro capital attitudes among a target population and establishes an ideological hegemony Thirdly media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty rising inequalities and the acceleration of global warming To illuminate this the book's historical chapter traces the emergence of media capitalism Its subsequent chapters show how media capitalism has infiltrated the public sphere society schools universities the world of work and finally democracy The book concludes by outlining how societies can transition from media capitalism to a post media capitalist society

Super Soldiers Jai Galliot, Mianna Lotz, 2016-03-03 The Spartan City State produced what is probably one of the most iconic and ruthless military forces in recorded history They believed that military training and education began at birth Post World War II saw a shift to army tanks fighter jets and missiles that would go on to fight the next huge battle in Northern Europe Today with the advent of unmanned systems our hopes are attached to the idea that we can fight our battles with soldiers pressing buttons in distant command centres However soldiers must now be highly trained super strong and have the intelligence and mental capacity to handle the highly complex and dynamic military operating environment It is only now as we progress into the twenty first century that we are getting closer to realising the

Spartan ideal and creating a soldier that can endure more than ever before This book provides the first comprehensive and unifying analysis of the moral legal and social questions concerning military human enhancement with a view toward developing guidance and policy that may influence real world decision making **Liturgy's Imagined Past/s** Teresa Berger, Bryan D. Spinks, 2016-05-03 This book calls attention to the importance of scholarly reflection on the writing of liturgical history The essays not only probe the impact of important shifts in historiography but also present new scholarship that promises to reconfigure some of the established images of liturgy s past Based on papers presented at the 2014 Yale Institute of Sacred Music Liturgy Conference Liturgy s Imagined Past s seeks to invigorate discussion of methodologies and materials in contemporary writings on liturgy s pasts and to resource such writing at a point in time when formidable questions are being posed about the way in which historians construct the object of their inquiry **Society and Education** Stavros Moutsios, 2017-07-20 Society and Education explores the relation of society to education in Europe as well as its comparative perspective towards overseas societies and their institutions It is an enquiry into the social historical institution of education and cross cultural studies in Europe Elaborating on the Castoriadian ontology the book delves into the magma of social imaginary significations that characterise and associate pivotal epochs of the continent s history Classical Greece and Modernity and exemplifies their incarnation in educational systems and in the formation of the European and in general the Western comparative gaze With a particular focus on our epoch Postmodernity and globalisation the study traces the pervasive dominance of capitalist significations in social institutions forms and activities as well as in education and the way it is compared across countries Nevertheless as Moutsios suggests the European tradition notwithstanding its ideological usage by much of social sciences contains an indissoluble critical and self reflective dimension which needs to be sustained and advanced in education and its cross cultural comparison perhaps more than ever before The book demonstrates the embeddedness of education in its cultural context and should therefore be of great interest to academics researchers and postgraduate students who are involved with comparative education the sociology and history of education education policy and European studies **Canadian Baptist Fundamentalism, 1878-1978** Taylor Murray, Paul R. Wilson, 2022-04-01 As the first single volume work to present a national picture of Baptist engagement with the fundamentalist movement in Canada in the late nineteenth and twentieth centuries Canadian Baptist Fundamentalism fills an important gap in the historiography It explores the contributions of well known fundamentalists such as T T Shields William Bible Bill Aberhart and J J Sidey while also introducing the reader to several lesser known figures including Joshua Denovan E J Stobo and T A Meister Together these studies demonstrate the diversity of the fundamentalist movement as it emerged and developed across Canada By drawing on material from across the country Canadian Baptist Fundamentalism addresses old themes in new ways and in the process raises a variety of questions and possibilities for new avenues of study *A Superior Spectre* Angela Meyer, 2018-07-23 Jeff is dying Haunted by memories and grappling with the shame of his desires he runs away to

remote Scotland with a piece of experimental tech that allows him to enter the mind of someone in the past Instructed to only use it three times Jeff self indulgent isolated and deteriorating ignores this advice In the late 1860s Leonora lives a contented life in the Scottish Highlands surrounded by nature her hands and mind kept busy Contemplating her future and the social conventions that bind her a secret romantic friendship with the local laird is interrupted when her father sends her to stay with her aunt in Edinburgh an intimidating sooty city the place where her mother perished But Leonora s ability to embrace her new life is shadowed by a dark presence that begins to lurk behind her eyes and strange visions that bear no resemblance to anything she has ever seen or known A Superior Spectre is a highly accomplished debut novel about our capacity for curiosity and our dangerous entitlement to it and reminds us the scariest ghosts aren t those that go bump in the night but those that are born and create a place for themselves in the human soul

The Geography of Names Gwilym Lucas Eades, 2016-07-15 This book examines geographical names place names and toponymy from philosophical and cultural evolutionary perspectives Geographical name tracking networks Geo NTN s are posited as tools for tracking names through time and across space and for making sense of how names evolve both temporally and spatially Examples from North and South American indigenous groups the Canadian arctic Wales England and the Middle East are brought into a theoretical framework for making sense of aspects of place naming practices beliefs and systems New geographical tools such as geographic information systems GIS and global positioning systems GPS are demonstrated to be important in the production and maintenance of robust networks for keeping names and their associated meanings viable in a rapidly changing world where place naming is being taken up increasingly in social media and other new mapping platforms The Geography of Names makes the case that geographical names are transmitted memetically i e as cultural units or memes through what Saul Kripke called communication chains Combining insights from Kripke with views of later Wittgenstein on language and names as being inherently spatial the present work advances theories of both these thinkers into an explicitly geographical inquiry that advances philosophical and practical aspects of naming language and mapping
