Enterprise Risk Management in Finance David L. Olson, 2015-05-26 Enterprise Risk Management in Finance is a guide to measuring and managing Enterprise wide risks in financial institutions Financial institutions operate in a unique manner when compared to other businesses They are by the nature of their business highly exposed to risk at every level and indeed employ their own risk management functions to manage many of these risks However financial firms are also highly exposed at enterprise level Traditional approaches and frameworks for ERM are flawed when applied to banks asset managers or insurance houses and a different approach is needed This new book provides a comprehensive technical guide to ERM for financial institutions Split into three parts it first sets the scene putting ERM in the context of finance houses It will examine the financial risks already inherent in banking and then insurance operations and how these need to be accounted for at a floor and enterprise level The book then provides the necessary tools to implement ERM in these environments including performance analysis credit analysis and forecasting applications Finally the book provides real life cases of successful and not so successful ERM in financial institutions Technical and rigorous this book will be a welcome addition to the literature in this area and will appeal to risk managers actuaries regulators and senior managers in banks and financial institutions

Technology Market Transactions Frank Tietze, 2012-01-01 This study of technology auctions is long overdue The book provides a better understanding of intermediaries and their role and impact in markets for technology Both scholars and managers will find it insightful Alfonso Gambardella Bocconi University Italy From this book managers academics and innovation policy makers will all benefit from new insights into the complex relationships between external technology exploitation strategies patents technology trade and open innovation processes The convincing evidence drawn from a dataset of technology auctions helps firms to understand which of their patents are suitable for auction and also provides guidance to intermediaries to help improve the auction models The data presented in this book contributes to further price transparency on technology markets and hence to their further development Hugo Tschirky ETH Zurich Switzerland Within the open innovation paradigm firms need to operate efficiently in markets for technology This book presents original research on technology transactions market intermediaries and specifically the role of auctions as a novel transaction model for patented technologies Frank Tietze delivers an in depth discussion of the impact of empirical results upon transaction cost theory and in so doing provides the means for better understanding technology transaction processes

in general and auctions in particular Substantiating transaction cost theory with empirical auction data the author goes on to explore how governance structures need to be designed for effective distributed innovation processes He concludes that the auction mechanism is a viable transaction model and illustrates that the auction design as currently operated by market intermediaries requires thorough adjustments Various options for possible improvements are subsequently prescribed The theoretical facets of this book will strongly appeal to business economists whilst its practical implications will provide an illuminating read for both academics and practitioners in the fields of innovation and intellectual property Revealing empirically substantiated technology prices this book will also prove to be of great interest to policy makers for further developing the markets for technology
