The Bird Of Time:

The Bird of Time Wallace West, 2016-04-14 When the first expedition from Earth arrived on Mars they were greeted with open arms Not only had the Martians long ago learned all they wanted about Earth they wanted nothing to do with us To quote their welcoming committee You Earth people don't know your own history You have always been incorrigible When Mars was younger we drove you back to your own planet whereupon you tumbled into savagery for a gratifyingly long time The really intelligent Martians then emigrated to the ends of the universe to avoid a second encounter In fact we are not interested in playing cowboys and indians with your people But Earthmen ARE incorrigible and Martians are obstinate and the result is an adventure packed novel that spans two planets and several stars and is great science fiction all the way A running chronicle of the conflict between the ancient feathered folk of Mars and the brash expansionists of Earth It is entertainment from start to finish with only snatches of the serious aspects of dying Mars and bull headed Earth Go along with the author and enjoy the story P Schuyler Miller Analog Science Fiction **The Bird of Time** N. W. Moore, 1987-02-27 This book is a plea to everyone but especially to politicians administrators farmers and businessmen to take conservation seriously and as a result to integrate conservation with other activities Through research work and land management the author shows how he came to realise that conservation matters much more fundamentally than is accepted by conventional wisdom He maintains that the significance of conservation will not be recognised until it is seen within its proper contents of time and this provides the theme of the book The newness of conservation as an idea and its complexities still provide obstacles to understanding its real significance In the past too much emphasis has been put on the negative and esoteric aspects of conservation This book is important because it emphasises its positive and common sense aspects and in so doing demonstrates that conservation should now be accepted as a major national and international objective of vital concern to everybody now and in the future The Bird of Time George Alec Effinger, 2014-04-01 Far into the future Hartstein's graduation present from his grandparents was a wonderful trip into the past He had a long future in the doughnut industry to look forward to but this trip was the icing on the cake It had been a long time since that first experiment in time travel was successfully pulled off although not without its flaws Now in the future time travel was a lucrative tourist industry But the time travel industry was keeping one little fact to itself two percent never came back This cover up was the work of the Agency The Agency knew what others did not that the past wasn't really the past but a complicated dynamic of individual perceptions of what the past might have been The past isn't real and reality becomes a state of mind While selling their particular brand of escapist entertainment and vacation packages the Agency didn't bother to tell its clients or the populace in general that a war was going on a time war The Agency was spending its time in a neck and neck battle with the Temporary Underground The battlefield was none other than the space time continuum the weapons were time shifts and theoretical mathematics Hartstein had no idea what his trip would be or where it would take him The Bird of Time
