Dubrofsky, Shoshana Amielle Magnet, 2015-05-15 Questions of gender race class and sexuality have largely been left unexamined in surveillance studies The contributors to this field defining collection take up these questions and in so doing provide new directions for analyzing surveillance They use feminist theory to expose the ways in which surveillance practices and technologies are tied to systemic forms of discrimination that serve to normalize whiteness able bodiedness capitalism and heterosexuality The essays discuss the implications of among others patriarchal surveillance in colonial North America surveillance aimed at curbing the trafficking of women and sex work women presented as having agency in the creation of the images that display their bodies via social media full body airport scanners and mainstream news media discussion of honor killings in Canada and the concomitant surveillance of Muslim bodies Rather than rehashing arguments as to whether or not surveillance keeps the state safe the contributors investigate what constitutes surveillance who is scrutinized why and at what cost The work fills a gap in feminist scholarship and shows that gender race class and sexuality should be central to any study of surveillance Contributors Seantel Ana s Mark Andrejevic Paisley Currah Sayantani DasGupta Shamita Das Dasgupta Rachel E Dubrofsky Rachel Hall Lisa Jean Moore Yasmin Jiwani Ummni Khan Shoshana Amielle Magnet Kelli Moore Lisa Nakamura Dorothy Roberts Andrea Smith Kevin Walby Megan M Wood Laura Hyun Yi Kang *Critical Trauma Studies* Monica Casper, Eric Wertheimer, 2016-03-15 Trauma is a universal human experience While each person responds differently to trauma its presence in our lives nonetheless marks a continual thread through human history and prehistory In Critical Trauma Studies a diverse group of writers activists and scholars of sociology anthropology literature and cultural studies reflects on the study of trauma and how multidisciplinary approaches lend richness and a sense of deeper understanding to this burgeoning field of inquiry The original essays within this collection cover topics such as female suicide bombers from the Chechen Republic singing prisoners in Iranian prison camps sexual assault and survivor advocacy and

families facing the devastation of Hurricane Katrina As it proceeds Critical Trauma Studies never loses sight of the way those who study trauma as an academic field and those who experience narrate and remediate trauma as a personal and embodied event inform one another Theoretically adventurous and deeply particular this book aims to advance trauma studies as a discipline that transcends intellectual boundaries to be mapped but also to be unmoored from conceptual and practical imperatives Remaining embedded in lived experiences and material realities Critical Trauma Studies frames the field as both richly unbounded and yet clearly defined historical and evidence based The Roman Mourner Valerie M. Hope, 2025-06-12 To date mourning has not featured prominently in studies of ancient Roman society and this book redresses this by presenting a comprehensive analysis of who mourners were and what mourners did as well as investigating the social cultural and ritual significance of mourning It brings together varied evidence ranging from literature and art to epigraphy which helps to illustrate the rituals of mourning Valerie M Hope addresses fundamental questions about how mourning was expressed displayed performed and experienced via the body and in turn what mourning can reveal about Roman society In previous literature on the topic roles played by mourners in funeral rituals and commemorative acts may be acknowledged but there has been little engagement with the varied emotional and physical behaviours of mourners When mourning has been considered the emphasis has predominantly fallen on gender and specific literary genres There have hitherto been few attempts to unite the diverse evidence for Roman mourning to consider different literary genres simultaneously or to evaluate how mourning was presented through material culture The evaluation of social expectations legal regulations and idealised roles across a diverse evidence base and time frame make this volume the first full and systematic study of mourning in the Roman world The Routledge Handbook of Food Ethics Mary Rawlinson, Caleb Ward, 2016-07-01 While the history of philosophy has traditionally given scant attention to food and the ethics of eating in the last few decades the subject of food ethics has emerged as a major topic encompassing a wide array of issues including labor justice public health social inequity animal rights and environmental ethics This handbook provides a much needed philosophical analysis of the ethical implications of the need to eat and the role that food plays in social cultural and political life Unlike other books on the topic this text integrates traditional approaches to the subject with cutting edge research in order to set a new agenda for philosophical discussions of food ethics The Routledge Handbook of Food Ethics is an outstanding reference source to the key topics problems and debates in this exciting subject and is the first collection of its kind Comprising over 35 chapters by a team of international contributors the Handbook is divided into 7 parts the phenomenology of food gender and food food and cultural diversity liberty choice and food policy food and the environment farming and eating other animals food justice Essential reading for students and researchers in food ethics it is also an invaluable resource for those in related disciplines such as environmental ethics and bioethics **Disability and U.S. Politics** Dana Lee Baker, 2017-01-16 More than 1 billion people worldwide have a disability and they are all affected by politics This two volume work explores key topics at the heart

**Corpses in Belgian Anatomy, 1860-1914** Tinne Claes,2019-11-20 This book tells the story of the thousands of corpses that ended up in the hands of anatomists in the late nineteenth and early twentieth centuries Composed as a travel story from the point of view of the cadaver this study offers a full blown cultural history of death and dissection with insights that easily go beyond the history of anatomy and the specific case of Belgium From acquisition to disposal the trajectories of the corpse changed under the influence of social policies ideological tensions religious sensitivities cultures of death and broader changes in the field of medical ethics Anatomists increasingly had to reconcile their ways with the diverse meanings that the dead body held To a certain extent as this book argues they started to treat the corpse as subject rather than object Interweaving broad historical evolutions with detailed case studies this book offers unique insights into a field dominated by Anglo American perspectives evaluating the similarities and differences within other European contexts

**The Medical Carnavalesque** Lisa Gabbert,2024-08-06 The practice of medicine is immersed in issues of life death and

suffering in relation to the mortal body Because of this the medical profession is a fertile arena for folklore that serves to address these topics among physicians In The Medical Carnavalesque Lisa Gabbert argues that this extraordinarily difficult work context has led to the development of an occupational corpus of folklore backstage talk and humor that she calls the medical carnivalesque Gabbert argues that suffering is not only something experienced by patients but that the organization practice and ethos of medicine can induce suffering in physicians themselves Featuring topics such as the institutionalized nature of physician suffering death related humor and talk stories about patient bodies and parodies of medical specialties

The Medical Carnavalesque shows us how the culture of contemporary medicine uses travesty humor and inversion to address the sometimes painful and often transgressive aspects of doctoring. The Medical Carnavalesque connects patient and physician suffering to laughter, acknowledges suffering as an essential component of life, and constitutes a way in which some physicians address the core philosophical and existential issues with which they regularly engage as they go about their daily work.
