Music, Mathematics and Language Keiji Hirata, Satoshi Tojo, Masatoshi Hamanaka, 2022-12-05 This book presents a new approach to computational musicology in which music becomes a computational entity based on human cognition allowing us to calculate music like numbers Does music have semantics Can the meaning of music be revealed using symbols and described using language The authors seek to answer these questions in order to reveal the essence of music Chapter 1 addresses a very fundamental point the meaning of music while referring to semiotics gestalt Schenkerian analysis and cognitive reality Chapter 2 considers why the 12 tone equal temperament came to be prevalent This chapter serves as an introduction to the mathematical definition of harmony which concerns the ratios of frequency in tonic waves Chapter 3 Music and Language explains the fundamentals of grammar theory and the compositionality principle which states that the semantics of a sentence can be composed in parallel to its syntactic structure In turn Chapter 4 explains the most prevalent score notation the Berklee method which originated at the Berklee School of Music in Boston from a different point of view namely symbolic computation based on music theory Chapters 5 and 6 introduce readers to two important theories the implication realization model and generative theory of tonal music GTTM and explain the essence of these theories also from a computational standpoint The authors seek to reinterpret these theories aiming at their formalization and implementation on a computer Chapter 7 presents the outcomes of this attempt describing the framework that the authors have developed in which music is formalized and becomes computable Chapters 8 and 9 are devoted to GTTM analyzers and the applications of GTTM Lastly Chapter 10 discusses the

future of music in connection with computation and artificial intelligence This book is intended both for general readers who are interested in music and scientists whose research focuses on music information processing In order to make the content as accessible as possible each chapter is self contained

Learning Music Theory with Logic, Max, and Finale Geoffrey Kidde, 2020-02-20 Learning Music Theory with Logic Max and Finale is a groundbreaking resource that bridges the gap between music theory teaching and the world of music software programs Focusing on three key programs the Digital Audio Workstation DAW Logic the Audio Programming Language APL Max and the music printing program Finale this book shows how they can be used together to learn music theory It provides an introduction to core music theory concepts and shows how to develop programming skills alongside music theory skills Software tools form an essential part of the modern musical environment laptop musicians today can harness incredibly powerful tools to create record and manipulate sounds Yet these programs on their own don't provide musicians with an understanding of music notation and structures while traditional music theory teaching doesn't fully engage with technological capabilities With clear and practical applications this book demonstrates how to use DAWs APLs and music printing programs to create interactive resources for learning the mechanics behind how music works Offering an innovative approach to the learning and teaching of music theory in the context of diverse musical genres this volume provides game changing ideas for educators practicing musicians and students of music The author's website at <http://www.geoffreykidde.com> includes downloadable apps that support this book

Charlie Parker, Composer Henry Martin, 2020 Charlie Parker Composer is the first assessment of a major jazz composer's oeuvre in its entirety Providing analytical discussion of each of Parker's works this study combines music theoretical historical and philosophical perspectives A variety of analytical techniques are brought to bear on Parker's compositions including application of a revised Schenkerian approach to the music that was developed through the author's prior publications After a review of Parker's life emphasizing his musical training and involvement in composition the book proceeds by considering the types of Parker pieces as categorized by overall form and harmony and the amount of preplanned music they contain The historical circumstances of each piece are reviewed and in some cases sources of the ideas of the most important tunes are explored The introduction includes a discussion of the ontology of a jazz composition The view is advanced that the Western concept of a music composition needs to be expanded to embrace practices typical of jazz composition and forming a significant part of Parker's work While focusing on Parker's more conventional tunes the book also considers his large scale melodic formulas Two formulas in particular are arguably compositional since they are repeated in subsequent performances of the same piece As part of the research for this book all of Parker's copyright submissions to the Library of Congress were examined and photographed The book reproduces the four of them that were copied by Parker himself
