The Trauma of Everyday Life Mark Epstein, M.D., 2014-07-29 A revolutionary reexamination of trauma's role in the life journey opening the door to growth and healing Trauma does not just happen to a few unlucky people it is the bedrock of our psychology Death and illness touch us all but even the everyday sufferings of loneliness and fear are traumatic In The Trauma of Everyday Life renowned psychiatrist and author of Thoughts Without a Thinker Mark Epstein uncovers the transformational potential of trauma revealing how it can be used for the mind's own development Western psychology teaches that if we understand the cause of trauma we might move past it while many drawn to Eastern practices see meditation as a means of rising above or distancing themselves from their most difficult emotions Both Epstein argues fail to recognize that trauma is an indivisible part of life and can be used as a lever for growth and an ever deeper understanding of change When we regard trauma with this perspective understanding that suffering is universal and without logic our pain connects us to the world on a more fundamental level The way out of pain is through it Epstein's discovery begins in his analysis of the life of Buddha looking to how the death of his mother informed his path and teachings The Buddha's spiritual

journey can be read as an expression of primitive agony grounded in childhood trauma Yet the Buddha s story is only one of many in *The Trauma of Everyday Life* Here Epstein looks to his own experience that of his patients and of the many fellow sojourners and teachers he encounters as a psychiatrist and Buddhist They are alike only in that they share in trauma large and small as all of us do Epstein finds throughout that trauma if it doesn t destroy us wakes us up to both our minds own capacity and to the suffering of others It makes us more human caring and wise It can be our greatest teacher our freedom itself and it is available to all of us Check out Epstein s latest book *Advice Not Given A Guide to Getting Over Yourself*

Museum Activism Robert R. Janes, Richard

Sandell, 2019-01-10 Only a decade ago the notion that museums galleries and heritage organisations might engage in activist practice with explicit intent to act upon inequalities injustices and environmental crises was met with scepticism and often derision Seeking to purposefully bring about social change was viewed by many within and beyond the museum community as inappropriately political and antithetical to fundamental professional values Today although the idea remains controversial the way we think about the roles and responsibilities of museums as knowledge based social institutions is changing Museum Activism examines the increasing significance of this activist trend in thinking and practice At this crucial time in the evolution of museum thinking and practice this ground breaking volume brings together more than fifty contributors working across six continents to explore analyse and critically reflect upon the museum s relationship to activism Including contributions from practitioners artists activists and researchers this wide ranging examination of new and divergent expressions of the inherent power of museums as forces for good and as activists in civil society aims to encourage further experimentation and enrich the debate in this nascent and uncertain field of museum practice Museum Activism elucidates the largely untapped potential for museums as key intellectual and civic resources to address inequalities injustice and environmental challenges This makes the book essential reading for scholars and students of museum and heritage studies gallery studies arts and heritage management and politics It will be a source of inspiration to museum practitioners and museum leaders around the globe
