Country Guide and Nor'west Farmer ,1927 International Perspectives on Leadership in Higher Education Alasdair Blair,Darrell Evans,Christina Hughes,Malcolm Tight,2022-11-21 As complex large institutions universities present unique challenges for leaders International Perspectives on Leadership in Higher Education examines how contemporary leaders in higher education in different disciplines at different levels and in different parts of the world are identified developed and supported *Research Perspectives on Social Media Influencers and Brand Communication* Brandi Watkins,2020-11-12 Research Perspectives on Social Media Influencers and Brand Communication examines the myriad ways in which social media and the unique characteristics of the internet have changed brand communication for both brands and consumers focusing on the social media influencer as a brand communicator As brands have noticed the rise of social media influencers as tastemakers and leaders in public opinion they have increasingly begun to incorporate social media influencers into their brand communication strategies Each chapter of this book represents a unique theoretical and methodological approach to examining the emergence and growing legitimacy of the social media influencer as a brand communicator from a variety of perspectives and contexts discussing challenges and opportunities afforded to brands by social media influencers and providing an overview of the current research on the use of these branding approaches Scholars of media studies communication and marketing will find this book particularly useful *Virtual Technical Services* Mary Beth Weber,Melissa De Fino,2022-04-25 Prior to the COVID pandemic there was little published information to guide technical services operations on how to deal with crises and emergencies Viewed as a backroom operation by administration little thought historically has been given to how these employees might protect equipment and resources and continue to provide services that seamlessly support the rest of the library Virtual Technical Services A Handbook is the first to address emergency and crisis planning specifically for technical services The authors address how to create an emergency plan and how to prepare for an uncertain future that will undoubtedly include other threats to our health and safety We discuss how the pivot to remote work can revolutionize technical services librarianship and allow us to better serve the needs of a 21st Century library As the WFH period extended longer than anticipated libraries and other organizations realized both the challenges and benefits of working remotely WFH is about more than just doing one's job and we focus on employees as individuals with needs that include work life balance self care and the flexibility to meet life circumstances including childcare eldercare and appointments A unique feature of our book is the focus on employee well being including burnout and self care Prior to COVID 19 employee well being was typically not emphasized as part of personnel management The risks to our health and

safety and being removed from the physical workplace provided the opportunity to re-examine priorities and reframe them to forge a stronger and more collaborative relationship between employers and employees. Technical services personnel in particular are subject to burnout as their operations are frequently understaffed and they face competing demands of serving both libraries' physical needs and supporting electronic and digital resources. Management in a remote work environment has challenges that are not present in an on-site operation. Communication, setting expectations, and documentation and training take on added significance when WFH, as does accountability. Our book addresses these aspects of management through a WFH lens. The book also covers the return to work after a shift to remote, whether it is completely on-site, hybrid, or some combination. Normalization, determining staffing levels, employee accommodations, and an adjustment period are discussed. Since most technical services personnel have not previously had to pivot to remote on short notice and for an extended period, the book addresses these issues for libraries as they make decisions about repopulating their workplaces.

The Innovation Race Andrew Grant, Gaia Grant, 2016-11-21. If innovation is a race, who wins? Who loses? Who gets eliminated, and how is it possible to stay ahead of the game? The Innovation Race takes readers on a lively global adventure to explore the current state of innovation. Along the way, best-selling authors Andrew and Gaia Grant search for clues on how to stay ahead in the race and design a more sustainable future. Asking the critical questions: Why do we innovate? Are we at risk of innovating for the sake of innovation? What could we be doing better? The Grants reflect on whether, if in the race to come up with the next big thing, we may be losing the purpose behind the process. They then outline how to navigate the key paradoxical challenges that can either frustrate or fuel innovation to change the game. By taking the latest academic research and presenting it in an accessible way, the Grants present a compelling case for forging a new path for the future. The Innovation Race provides concrete strategies to support purpose-driven, sustainable innovation through deep cultural transformation. A unique profiling tool reveals current organisation positioning along with potential opportunities and challenges. A practical culture change model then provides clear direction for proactive change. With economists estimating that up to 80 per cent of growth comes from new ideas and innovations, this thought-provoking book provides the strategies and tools to learn how to create an innovation culture for long-term success. Identify your own sweet spot for innovative thinking. Learn the strategies to transform your organisation. Engage and motivate employees toward innovative action. Excel in implementing a deep cultural shift. The Innovation Race will make you reassess what you assumed you knew about innovation, help boost the innovation process to new levels, and bring your organisation to the forefront.
