South African Military Training Programme 2015 2016:

South Africa's Post-Apartheid Military Lindy Heinecken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming, the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged, HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

U.S. Security Cooperation with Africa Robert J. Griffiths, 2016-04-14 As Africa's strategic importance has increased over the past decade and a half, United States security cooperation with the continent has expanded. The most visible dimension of this increased engagement was the establishment of the U.S. Military Command for Africa (AFRICOM). Some critics are skeptical of AFRICOM's purpose and see the militarization of U.S. Africa policy, while others question its effectiveness. Recognizing the link between development and security, AFRICOM represents a departure from the traditional organization of military commands because of its holistic approach and the involvement of the Department of State as well as other U.S. government stakeholders. Nevertheless, AFRICOM's effort to combine security and development faces formidable conceptual and operational challenges in trying to ensure both American and African security interests. The human security perspective's emphasis on issues that go beyond traditional state-centered security to include protecting individuals from threats of hunger, disease, crime, environmental degradation and political repression, as well as focusing on social and economic justice, is an important component of security policy. At the same time, the threat of violent extremism heavily influences U.S. security cooperation with Africa. In this examination of the context of U.S.-African security relations, Robert J. Griffiths outlines the nature of the African state, traces the contours of African conflict, surveys the post-independence history of U.S. involvement on the continent and discusses policy, organization and implementation and the impact of U.S. experiences in Iraq and Afghanistan on the U.S.-Africa security relationship. Africa's continuing geostrategic significance, the influence of China and other emerging markets in the region and America's other global engagements, especially in light of U.S. fiscal realities, demonstrate the complexity of U.S.-African security cooperation.
