Security, Governance, and State Fragility in South Africa Edward L. Mienie, 2020-03-06 Do existing measures of state fragility measure fragility accurately Based on commonly used fragility measures South Africa SA is classified as a relatively stable state yet rising violent crime high unemployment endemic poverty eroding public trust identity group based preferential treatment policies and the rapid rise of the private security sector are all indications that SA may be suffering from latent state fragility Based on a comprehensive view of security this study examines the extent to which measures of political legitimacy and good governance effectiveness in the security system especially with respect to the police system and mounting economic challenges may be undermining the stability of SA in ways undetected by commonly used measures of state fragility Using a mixed methods approach based on quantitative secondary data analysis and semi structured interviews with government officials security practitioners and leading experts in the field this study finds that the combination of colonization apartheid liberation struggle transition from autocracy to democracy high levels of direct and structural violence stagnating social political and economic developments make South Africa a latently fragile state Conceptually the results of this research call into question the validity of commonly used measures of state fragility and suggest the need for a more comprehensive approach to assessing state fragility Practically this study offers a number of concrete policy recommendations for how South Africa may address mounting levels of latent state fragility **Suid-Afrikaanse**

Corruption, Ethics, and Governance in South Africa Modimowabarwa Kanyane, 2024-05-20 This book assesses landmark empirical studies, state capture concerns, corruption and fraud in South Africa's public sector and thereby reflects on issues of accountability and ethics as cornerstones of governance. Bringing together some of the best minds about corruption, ethics and governance from a multidisciplinary perspective the book pushes critical thinking to interrogate interventions that could stamp out and stop the rot of corruption in society. The book investigates the behaviours of officials and politicians engaging in acts of corruption and considers how state institutions have been captured and corrupted by these people. Considering South Africa's historical and regional context the book also considers the role of watchdogs, auditors and public opinion. In suggesting mechanisms for combating and preventing corruption the book ultimately advocates for long-lasting preventive interventions instead of current short-lived and costly approaches to combating corruption. Combining original case studies, empirical work and some comparisons in Zimbabwe and Botswana with South Africa this book will be of interest to students, researchers and policymakers working on corruption, ethics and governance from the context of public administration and law.
