Re-creating the American Past Richard Guy Wilson, Shaun Eyring, Kenny Marotta, 2006. Although individually and collectively Americans have many histories, the dominant view of our national past focuses on the colonial era. The reasons for this are many and complex, touching on stories of the country's origins and of the founding fathers, the privileged position in history granted the thirteen original colonies, and the ways in which the nation has adjusted to change and modernity. But no matter the cause, the result is obvious: images and forms derived from and related to America's colonial past are the single most popular form of cultural expression. Often conceived solely in architectural terms, from the red brick and white trimmed buildings that recall eighteenth-century James River estates to the clapboarded saltboxes that recall early New England, Colonial Revival is in fact better understood as a process of remembering. In *Re-creating the American Past*, architectural historian Richard Guy Wilson and a host of other scholars examine how and why Colonial Revival has persisted in modern times. The volume contains essays that explore Colonial Revival expressions in architecture, landscape architecture, historic preservation, decorative arts, and painting and sculpture, as well as the social, intellectual, and cultural background of the phenomena. Based on the University of Virginia's landmark 2000 conference, *The Colonial Revival in America*, *Re-creating the American Past* is a comprehensive and handsome volume that recovers the origins, characteristics, diversity, and significance of the Colonial Revival, situating it within the broader history of American design, culture, and society.

The Routledge Companion to Women in Architecture Anna Sokolina, 2021-06-28. *The Routledge Companion to Women in Architecture* illuminates the names of pioneering women who over time continue to foster, shape, and build cultural, spiritual, and physical environments in diverse regions around the globe. It uncovers the remarkable evolution of women's leadership, professional perspectives, craftsmanship, and scholarship in architecture from the preindustrial age to the present. The book is organized chronologically in five parts, outlining the stages of women's expanding engagement, leadership, and contributions to architecture through the centuries. It contains twenty-nine chapters written by thirty-three recognized scholars committed to probing broader topographies across time and place and presenting portraits of practicing architects, leaders, teachers, writers, critics, and other kinds of professionals in the built environment. The intertwined research sets out debates, questions, and projects around women in architecture, stimulates broader studies and discussions in emerging areas, and becomes a catalyst for academic programs and future publications on the subject. The novelty of this volume is in presenting not only a collection of case studies but in broadening the discipline by advancing an incisive overview of the topic as a whole. It is an invaluable resource for architectural historians, academics, students, and professionals.

The Mexican Border Cities Daniel D. Arreola, 1994-02-01 From Matamoros to Tijuana Mexican border cities have long evoked for their neighbors to the north images of cheap tourist playgrounds and more recently industrial satellites of American industry These sensationalized and simplified perceptions fail to convey the complexity and diversity of urban form and function and of cultural personality that characterize these places *The Mexican Border Cities* draws on extensive field research to examine eighteen settlements along the 2 000 mile border ranging from towns of less than 10 000 people to dynamic metropolises of nearly a million The authors chronicle the cities growth and compare their urban structure analyzing them in terms of tourist districts commercial landscapes residential areas and industrial and transportation quarters Arreola and Curtis contend that despite their proximity to the United States the border cities are fundamentally Mexican places as distinguished by their cultural landscapes including town plan land use pattern and building fabric Their study richly illustrated with over 75 maps and photographs offers a provocative and insightful interpretation of the geographic anatomy and personality of these fascinating and rapidly changing communities

and countless other colorful figures of the period There are also fascinating sections on the city s architecture the impact of the automobile on city planning the Hollywood film community the L A literati and much more By the end of the decade Los Angeles had tripled in population and become the fifth largest city in the nation In *Material Dreams* Starr captures this explosive growth in a narrative tour de force that combines wide ranging scholarship with captivating prose Highland Park and River Oaks Cheryl Caldwell Ferguson,2014-08-30 Shows how the developers of Highland Park in Dallas and River Oaks in Houston were trying to create better living conditions in a countryside atmosphere away from the uncontrolled development that had blighted late 19th century and early 20th century urban neighborhoods in Texas Also explores why planned suburban and community growth failed at the city wide level and remained confined to elite suburbs Also looks at subdivisions in Fort Worth San Antonio Amarillo Wichita Falls Beaumont Galveston and Port Arthur to provide information on how city planners worked with landscape architects to incorporate infrastructure improvements coordinate landscape planning and employ such legal devices as restrictive covenants to shape elite space coherently The work of Texas foremost suburban house architects such as C D Hill William Ward Watkin and John F Staub is also analyzed *Guide to America; a Treasury of Information about Its States, Cities, Parks, and Historical Points of Interest* ,1947
