**The Oxford Handbook of International Antitrust Economics** Roger D. Blair, D. Daniel Sokol, 2015 More than any other area of regulation antitrust economics shapes law and policy in the United States the Americas Europe and Asia In a number of different areas of antitrust advances in theory and empirical work have caused a fundamental reevaluation and shift of some of the assumptions behind antitrust policy This reevaluation has profound implications for the future of the field This Handbook has collected chapters from many of the leading figures in antitrust *L'innovation prédatrice en droit de la concurrence* Thibault Schrepel, 2019-01-24 L'innovation est la clé de voûte des économies numériques mais elle est aussi parfois un prétexte pour maquiller des pratiques qui ayant l'apparence de réelles innovations sont en réalité des stratégies anti-concurrentielles qui ont pour objectif d'éliminer la concurrence sans pour autant être bénéfiques aux consommateurs Pour cette raison reconnaître un régime propre à l'innovation prédatrice est l'un des impératifs juridiques de ce début de 21<sup>e</sup> siècle Les pratiques qui s'y rattachent surviennent quotidiennement et visent à altérer le fonctionnement des produits et des technologies tierces Ces pratiques concernent donc l'ensemble des entreprises qui opèrent sur les marchés technologiques et de fait tous les consommateurs Les règles actuelles de droit de la concurrence ne permettent d'appréhender qu'une faible partie des pratiques d'innovation prédatrice Cette inadaptabilité de la règle de droit met également en danger les dirigeants et chefs d'entreprise qui peuvent être sanctionnés par les juges et autorités de concurrence sur des fondements peu clairs Il est donc urgent que l'innovation prédatrice soit reconnue comme tant une pratique anti-concurrentielle indépendante Le marché une fois libéré de ces stratégies prédatrices ne se trouvera que plus libre Cet ouvrage en plus de présenter une typologie des pratiques d'innovation prédatrice propose pour la première fois la création d'un régime dédié Il constitue ce titre un indispensable pour qui s'intéresse aux problématiques concurrentielles liées aux nouvelles technologies **The Oxford**

**Enforcement** Andreas Scordamaglia-Tousis, 2013-08-01 There has been a long standing debate on the compatibility of EU competition law with fundamental rights protection particularly as the latter is enshrined in the due process requirements of the European Convention on Human Rights ECHR This book a signal contribution to that debate assesses two questions of paramount concern first whether the current level of fundamental rights protection in cartel enforcement falls within the accepted ECHR standards and second how the often conflicting objectives of effectiveness and adequate protection of fundamental rights could optimally be achieved Following a detailed survey of relevant EU institutional substantive and procedural law rules the author offers a set of persuasive normative responses to both questions Proceeding from an in depth analysis of the pertinent rights and legal nature of competition proceedings under EU and ECHR law the author goes on to examine such elements of the perceived incompatibility as the following investigatory powers vested in competition authorities the privilege against self incrimination right to privacy fair trial probatory requirements degree of use of presumptions in EU practice Article 6 ECHR guarantees pertaining to the presumption of innocence proving coordination of competitive behaviour proving restriction of competition admissibility of evidence before EU Courts and the Commission assessment of the attribution of liability rules EU fining rules judicial review of cartel decisions by EU Courts and national sanctioning rules The author's extraordinarily thorough presentation is rounded off with a remarkably comprehensive bibliography that lists in addition to books and articles newspaper articles EU regulations and directives soft law guidelines and best practices EU and ECtHR case law EU Advocate General opinions European Commission decisions and European Ombudsman decisions General conclusions stress the necessity of introducing further reforms to enhance the effectiveness and legitimacy of fundamental rights in the context of competition proceedings Few books have taken such a thorough and far reaching approach to the reconciliation of effective public enforcement and fundamental rights or of effective deterrence with the principles of legality non retroactivity presumption of innocence and ne bis in idem In the depth of its appraisal of the entire spectrum of enforcement components from a fundamental rights perspective the book is without peers It will be warmly welcomed by any parties interested in the intersection of competition law and human rights *The European*

[Managing the Regulatory Process](#) J. Luis Guasch, Pablo Tomas Spiller, 1999-01-01. Developing countries complementing their far-reaching privatization programs are engaged in deregulating various sectors of their economies and devising new regulatory frameworks for others, particularly the utilities sectors. As economies become more open, pressures on countries to become more competitive drive the call for regulatory reform to reduce costs and foster increased productivity, competitiveness, and growth. This report provides an overview of the

costs and benefits of regulation throughout the world It provides case histories of regulation in different countries developed and developing and in various sectors such as transportation utilities and power It presents different strategies that were employed Furthermore it identifies lessons learned and lays the foundations for a best practice scenario for other countries to adopt While the challenges to regulatory reform are considerable so are the efforts that developing countries are making to face them These lessons when properly adapted to each country s own environment can significantly increase the likelihood of effective regulation Introduction to The Oxford Handbook of International Antitrust Economics Roger D. Blair,D. Daniel Sokol,2015 Antitrust economics is a subset of industrial organization economics What makes antitrust economics rather unique is the centrality of economic analysis to the development of antitrust law and policy In the United States antitrust economics guides all antitrust analysis by government enforcers at the federal level the Department of Justice Antitrust Division and the Federal Trade Commission and courts In other systems the centrality of antitrust economics to antitrust law typically called competition law and policy has not been established Instead cutting edge antitrust economic analysis competes with non antitrust economics goals Nevertheless across the major non US jurisdictions antitrust economics is far more utilized now than previously With global mergers and various types of conduct increased coordination across agencies practitioner lawyers and economists around the world trained in the latest theories of antitrust economics and a rise of economic analysis in decision making by adjudicators the increasing role of international antitrust economics seems somewhat inevitable The desire to provide scholars and policy makers across jurisdictions a reference tool to understand the most important developments in antitrust economics motivates this introduction to the handbook We have assembled many of the most important scholars in the field to provide overviews and analysis of the core issuers in antitrust economics Although no handbook can be exhaustive we have attempted to cover all of what we believe to be the major topics in the field The developments in economic analysis across these areas that the handbook covers will shape policy and legal issues in the field for some time Trade Regulation, Antitrust, and Economics ,1981 Bowker's Law Books and Serials in Print ,1998
