Innovation in Japan Keith Jackson, Phillipe Debroux, 2013-10-18 The Japanese economy has made a remarkable recovery from the so called Lost Decade of the 1990s This said demographic trends suggest that Japan will have to show remarkable powers of innovation if it is to continue to prosper in the global economy For around the turn of the last century texts published by prominent strategy analysts such as Michael Porter and colleagues were asking whether Japan could continue

to compete at all and in answering this question they not only gained significant global attention they also appeared to sound the death knell for strategic innovation in Japan This collection helps put the record straight It invites authors and editors of previous Routledge titles on the topic of Innovation in Japan to reflect on how things have moved on prominent scholars on Japanese innovation such as Martin Hemmert Cornelia Storz and Ruth Taplin all of whom appear in this collection It brings together fresh perspectives on Japanese style innovation from insiders and from outsiders from scholars and from practitioners all of whose combined contributions to this book update our understanding of how patterns of innovation in Japan are evolving and thus provide inspiration and guidance for managers and innovators worldwide

Dialectic of Sedimentation and Innovation Mabiala Justin-Robert Kenzo, 2009 One of the most important developments in the episteme of our time is the recognition that all being and all knowing are socially conditioned This recognition raises the question of subjective creativity Is creativity or innovation possible What is the locus of creativity Is it the subject or the structure of the structures of being of which the subject is part Any notion of creativity that takes seriously the condition of being is therefore bound to deal with the perennial issue of freedom and determinism *Dialectic of Sedimentation and Innovation* examines the contribution of Paul Ricoeur to this question for the purpose of theological consumption Ricoeur's philosophical reconstruction of the subject as self creates a space midway between the modern self positing subject and the postmodern deconstructed subject where reason rules but does not tyrannize It is from this space that he proposes a view of humanity that argues that to be human is to be homo voluntas homo lingua and homo capax *Dialectic of Sedimentation and Innovation* seeks to theologically appropriate these notions for Africa's quest for a new creative identity

Creative Rationality and Innovation Joelle Forest, 2018-01-03 This book urges us to be creative in our way of thinking about innovation Adopting an artificial

perspective the author emphasizes creative rationality a form of thought that encourages knowledge crossing and invites an adventurous transgression The question of how such a form of thought might be developed is addressed through a detailed examination of the educational system The book frees itself from many of the myths that surround innovation including the predominance of what the author calls the linear and hierarchical model Science, Technology and Innovation Culture
Marianne Chouteau, Joelle Forest, Céline Nguyen, 2018-10-09 We are facing unprecedented challenges today For many of us innovation would be our last hope But how can it be done Is it enough to bet on the scientific culture How can technical culture contribute to innovation How is technical culture situated with regards to what we name collectively the culture of innovation It is these questions that this book intends to address
