relationships QSAR in chemistry biology pharmacology toxicology and environmental sciences has seen strong growth New
journals and books have appeared in each of these fields however the combination of QSAR and environmental sciences is
still in its infancy After the success of the Workshop on Quantitative Structure Activity Relationships QSAR in Environmental
Toxicology held at McMaster University Aug ust 16 18 1983 with the proceedings publ ished in 1984 QSA R in Environmental
Toxicology Kaiser K L E Ed D Reidel Pub Co Dordrecht 406 p ISBN 90 277 1776 1 it was time to hold another workshop in
1986 Indeed the response by the scientific community was excellent with over 50 participants from Canada Germany Great
Britain Hungary India Japan The Netherlands United States and Yugoslavia Moreover both breadth and depth of papers
given were significantly improved and the workshop discussions were intense and frank Regrettably the number of
participants number of papers given and submitted for these proceedings made it impossible to include the workshop
discussions of these papers However several manuscripts were revised on the basis of these discussions and therefore do
reflect this very interactive workshop This volume presents the majority of papers given at the 2nd International Workshop
on QSAR in Environmental Toxicology held at McMaster University June 9 13 1986 Many of these papers contain primary
new scientific data equations and results which will not appear elsewhere *Catalogue of Copyright Entries* ,1954
