Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Whether made for military strategy or urban reform to encourage settlement or to investigate disease, maps invest information with meaning by translating it into visual form. They capture what people knew, what they thought they knew, what they hoped for, and what they feared. As such, they offer unrivaled windows onto the past. In this book, Susan Schulten uses maps to explore five centuries of American history from the voyages of European discovery to the digital age. With stunning visual clarity, *A History of America in 100 Maps* showcases the power of cartography to illuminate and complicate

our understanding of the past Gathered primarily from the British Library's incomparable archives and compiled into nine chronological chapters these one hundred full color maps range from the iconic to the unfamiliar Each is discussed in terms of its specific features as well as its larger historical significance in a way that conveys a fresh perspective on the past Some of these maps were made by established cartographers while others were made by unknown individuals such as Cherokee tribal leaders soldiers on the front and the first generation of girls to be formally educated Some were tools of statecraft and diplomacy and others were instruments of social reform or even advertising and entertainment But when considered together they demonstrate the many ways that maps both reflect and influence historical change Audacious in scope and charming in execution this collection of one hundred full color maps offers an imaginative and visually engaging tour of American history that will show readers a new way of navigating their own worlds
