Gleim,Dale L. Flesher,1992 An Analysis of Gayatri Chakravorty Spivak's Can the Subaltern Speak? Graham Riach,2017-07-05 A critical analysis of Spivak s classic 1988 postcolonial studies essay in which she argues that a core problem for the poorest and most marginalized in society the subalterns is that they have no platform to express their concerns and no voice to affect policy debates or demand a fairer share of society s goods A key theme of Gayatri Spivak s work is agency the ability of the individual to make their own decisions While Spivak s main aim is to consider ways in which subalterns her term for the indigenous dispossessed in colonial societies were able to achieve agency this paper concentrates specifically on describing the ways in which western scholars inadvertently reproduce hegemonic structures in their work Spivak is herself a scholar and she remains acutely aware of the difficulty and dangers of presuming to speak for the subalterns she writes about As such her work can be seen as predominantly a delicate exercise in the critical thinking skill of interpretation she looks in detail at issues of meaning specifically at the real meaning of the available evidence and her paper is an attempt not only to highlight problems of definition but to clarify them What makes this one of the key works of interpretation in the Macat library is of course the underlying significance of this work Interpretation in this case is a matter of the difference between allowing subalterns to speak for themselves and of imposing a mode of speaking on them that however well intentioned can be as damaging in the postcolonial world as the agency stifling political structures of the colonial world itself By clearing away the detritus of scholarly attempts at interpretation Spivak takes a stand against a specifically intellectual form of oppression and marginalization Independent Review of the Zambian Health Reforms: Main report ,1996 The Crusades Robert Houghton,Damien Peters,2017-07-05 For many centuries the history of the crusades as written by Western historians was based solidly on Western sources Evidence from the Islamic societies that the crusaders attacked was used only sparingly in part because it was hard for most westerners to read and in part because much of it was inaccessible even for historians who did speak Arabic Carole Hillenbrand set out to re evaluate the sources for the crusading period not only looking with fresh eyes at known accounts but also locating and utilizing new sources that had previously been overlooked Her work involved her in conducting extensive evaluations of the new sources assessing their arguments their evidence and their reasoning in order to assess their value and using the critical thinking skill of analysis a powerful method for understanding how arguments are built to place them correctly in the context of crusade studies as a whole The result is not only a history that is more balanced better argued and more adequate than most that have gone before it but also a work with relevance for today At a time when crusading imagery and mentions of the current War on

Terror as a crusade help to fuel political narrative Hillenbrand s evaluative work acts as an important corrective to oversimplification and misrepresentation

An Analysis of Alfred W. Crosby's The Columbian Exchange Joshua Specht,Etienne Stockland,2017-07-05 One criticism of history is that historians all too often study it in isolation failing to take advantage of models and evidence from scholars in other disciplines This is not a charge that can be laid at the door of Alfred Crosby His book The Columbian Exchange not only incorporates the results of wide reading in the hard sciences anthropology and geography but also stands as one of the foundation stones of the study of environmental history In this sense Crosby s defining work is undoubtedly a fine example of the critical thinking skill of creativity it comes up with new connections that explain the European success in colonizing the New World more as the product of biological catastrophe in the shape of the introduction of new diseases than of the actions of men and posits that the most important consequences were not political the establishment of new empires but cultural and culinary the population of China tripled for example as the result of the introduction of new world crops Few new hypotheses have proved as stimulating or influential
