

Sec 1 Spain's Empire and European Absolutism

Charles V

- **Charles V** (the 5th) was the ruler of the **Holy Roman Empire** and other lands.
- He was a king from the **Hapsburg** family, a famous royal family.
- He was a Catholic Christian.
- He ruled Spain, parts of Italy, lands in Austria and the Netherlands, and parts of Germany.
- But he also controlled **Spain's colonies in America** (places in America that Spain had conquered).
- It was the first time since Charlemagne that a European ruler controlled so many lands.
- Charles V opposed the Muslims and the **Lutherans** (people who followed Martin Luther) because they were against the Catholic Church.
- He was one of the most important kings of his time, and his empire was very powerful.

Charles retires

- Charles V eventually got old and decided to retire from being a king. He devoted his life at a Catholic monastery, a religious place of worship.
- He handed his empire to two people:
 1. His brother, Ferdinand
 2. His son, Philip II

Let's look at each of them in more detail ...

Blinnikov, 2011-01-01 Comprehensive and authoritative this text offers an accessible introduction to post Soviet Eurasia Students get a solid grounding in the physical cultural political and economic geography of this rapidly changing region Core thematic chapters focus primarily on Russia but also incorporate relevant information on the other 14 former Soviet republics Regional chapters provide concise discussions of each republic and of Russia's main regions Student friendly features include engaging vignettes review questions exercises recommendations for further reading and Internet resources The volume's over 200 original maps photographs and other figures are also available as PowerPoint slides at the companion website **Creating Christian Granada** David Coleman, 2013-08-15 Creating Christian Granada provides a richly detailed examination of a critical and transitional episode in Spain's march to global empire The city of Granada Islam's final bastion on the Iberian peninsula surrendered to the control of Spain's Catholic Monarchs Isabella and Ferdinand on January 2 1492

Over the following century Spanish state and Church officials along with tens of thousands of Christian immigrant settlers transformed the formerly Muslim city into a Christian one. With constant attention to situating the Granada case in the broader comparative contexts of the medieval reconquista tradition on the one hand and sixteenth century Spanish imperialism in the Americas on the other, Coleman carefully charts the changes in the conquered city's social, political, religious, and physical landscapes. In the process, he sheds light on the local factors contributing to the emergence of tensions between the conquerors and Granada's formerly Muslim native morisco community in the decades leading up to the crown-mandated expulsion of most of the city's moriscos in 1569-1570. Despite the failure to assimilate the moriscos, Granada's status as a frontier Christian community under construction fostered among much of the immigrant community innovative religious reform ideas and programs that shaped in direct ways a variety of church-wide reform movements in the era of the ecumenical Council of Trent (1545-1563). Coleman concludes that the process by which reforms of largely Granadan origin contributed significantly to transformations in the Church as a whole forces a reconsideration of traditional top-down conceptions of sixteenth-century Catholic reform.

Oxford Handbook of Internet Psychology Adam Joinson, Katelyn McKenna, Tom Postmes, Ulf-Dietrich Reips, 2009-02-12. Over one billion people use the Internet globally. Psychologists are beginning to understand what people do online and the impact being online has on behaviour. It's making us re-think many of our existing assumptions about what it means to be a social being. For instance, if we can talk, flirt, meet people and fall in love online, this challenges many of psychology's theories that intimacy or understanding requires physical co-presence. The Oxford Handbook of Internet Psychology brings together many of the leading researchers in what can be termed Internet Psychology. Though a very new area of research, it is growing at a phenomenal pace. In addition to well-studied areas of investigation such as social identity theory, computer-mediated communication, and virtual communities, the volume also includes chapters on topics as diverse as deception and misrepresentation, attitude change, and persuasion online, Internet addiction, online relationships, privacy, and trust, health and leisure use of the Internet, and the nature of interactivity. With over 30 chapters written by experts in the field, the range and depth of coverage is unequalled and serves to define this emerging area of research. Uniquely, this content is supported by an entire section covering the use of the Internet as a research tool, including qualitative and quantitative methods, online survey design, personality testing, ethics, and technological and design issues. While it is likely to be a popular research resource to be dipped into as a whole, volume it is coherent and compelling enough to act as a single text book. The Oxford Handbook of Internet Psychology is the definitive text on this burgeoning field. It will be an essential resource for anyone interested in the psychological aspects of Internet use or planning to conduct research using the net.
