Kierkegaard's Journals and Notebooks Volume 10 Søren Kierkegaard, 2018-08-14 For over a century the Danish thinker Søren Kierkegaard 1813-55 has been at the center of a number of important discussions concerning not only philosophy and theology but also more recently fields such as social thought psychology and contemporary aesthetics especially literary theory Despite his relatively short life Kierkegaard was an extraordinarily prolific writer as attested to by the 26 volume Princeton University Press edition of all of his published writings But Kierkegaard left behind nearly as much unpublished writing most of which consists of what are called his journals and notebooks Kierkegaard has long been recognized as one of history's great journal keepers but only rather small portions of his journals and notebooks are what we usually understand by the term diaries By far the greater part of Kierkegaard's journals and notebooks consists of reflections on a myriad of subjects philosophical religious political personal Studying his journals and notebooks takes us into his workshop where we can see his entire universe of thought We can witness the genesis of his published works to be sure but we can also see whole galaxies of concepts new insights and fragments large and small of partially or almost entirely completed but unpublished works Kierkegaard's Journals and Notebooks enables us to see the thinker in dialogue with his times and with himself Kierkegaard wrote his journals in a two column format one for his initial entries and the second for the extensive marginal comments that he added later This edition of the journals reproduces this format includes several photographs of original manuscript pages and contains extensive scholarly commentary on the various entries and on the history of the manuscripts being reproduced Volume 10 of this series includes the final six of Kierkegaard's important NB journals Journals NB31 through NB36 which cover the last months of 1854 a period when Kierkegaard made the final preparations for and the initial launch of his furious assault on the established church But in addition to this incendiary material these journals also contain a great trove of his reflections on theology philosophy and the perils and opportunities of modernity **The Environment and World History** Edmund Burke III, Kenneth Pomeranz, 2009-04-08 Since around 1500 C.E. humans have shaped the global environment in ways that were previously unimaginable Bringing together leading environmental historians and world historians this book offers an overview of global environmental history throughout this

remarkable 500 year period In eleven essays the contributors examine the connections between environmental change and other major topics of early modern and modern world history population growth commercialization imperialism industrialization the fossil fuel revolution and more Rather than attributing environmental change largely to European science technology and capitalism the essays illuminate a series of culturally distinctive yet often parallel developments arising in many parts of the world leading to intensified exploitation of land and water The wide range of regional studies including some in Russia China the Middle East India Southeast Asia Latin America Southern Africa and Western Europe together with the book s broader thematic essays makes *The Environment and World History* ideal for courses that seek to incorporate the environment and environmental change more fully into a truly integrative understanding of world history
