Choosing State Supreme Court Justices Greg Goelzhauser, 2016-06-15 Since 1940 more than half of all states have switched at least in part from popular election or elite appointment to experiment with merit selection in choosing some or all of their state supreme court justices Under merit selection a commission often comprising some combination of judges attorneys and the general public is tasked with considering applications from candidates vying to fill a judicial vacancy Ostensibly the commission forwards the best candidates to the governor who ultimately appoints them Presently numerous states are debating whether to adopt or abolish merit selection In his short sharp book *Choosing State Supreme Court Justices* Greg Goelzhauser utilizes new data on more than 1,500 state supreme court justices seated from 1960 through 2014 to answer the question Does merit selection produce better types of judges He traces the rise of merit selection and explores whether certain judicial selection institutions favor candidates who have better qualifications are more diverse and have different types of professional experience Goelzhauser's results ultimately contribute to the broader debate concerning comparative institutional performance with respect to state judicial selection

tradition an invaluable resource for researchers and teachers Michael McCann Gordon Hirabayashi Professor for the Advancement of Citizenship University of Washington Law and society scholars challenge the common belief that law is simply a neutral tool by which society sets standards and resolves disputes Decades of research shows how much the nature of communities organizations and the people inhabiting them affect how law works Just as much law shapes beliefs behaviors and wider social structures but the connections are much more nuanced and surprising than many expect Law and Society Reader II provides an accessible overview to the breadth of recent developments in this research tradition bringing to life this dynamic field In this second volume editors Erik W Larson and Patrick D Schmidt have compiled excerpts of 43 illuminating articles published since 1993 in The Law Society Review the flagship journal of the Law and Society Association By its organization and approach this volume enables readers to join in discussing the key ideas of law and society research The selections highlight the core insights and developments in this research tradition making these works indispensable for those exploring the field and ideal for classroom use Across six concisely introduced sections it analyzes inequality lawyering the relation between law and organizations and the place of law in relation to other social institutions **Ranking**

Obsession Culture Sienna Vance, AI, 2025-04-07 Ranking Obsession Culture examines the pervasive influence of rankings on legal education impacting student choices and institutional behavior It explores how the pursuit of higher rankings affects where students choose to attend law school and how law schools allocate resources The book uniquely combines law economics psychology and sociology to provide a multifaceted understanding of this phenomenon The book delves into the psychological impact of rankings on prospective students revealing how perceptions of prestige can drive decisions and analyzes how law schools strategically adapt admissions practices to improve their ranking position It also addresses the potential distortions caused by a singular focus on metrics such as a diminished emphasis on teaching quality The text unfolds by first introducing the history of ranking systems then examining the psychological factors driving student fixation and finally exploring the ethical implications of ranking driven behavior The book offers a critical perspective on the role of rankings in shaping decisions within the legal education market By connecting to broader themes in higher education policy organizational behavior and sociology it provides insights relevant to other professional fields This analysis challenges assumptions made by students faculty and administrators advocating for a more holistic understanding of institutional value and the need for comprehensive assessment methods beyond just rankings *Engines of Anxiety* Wendy Nelson

Espeland, Michael Sauder, Wendy Espeland, 2016-05-09 Students and the public routinely consult various published college rankings to assess the quality of colleges and universities and easily compare different schools However many institutions have responded to the rankings in ways that benefit neither the schools nor their students In *Engines of Anxiety* sociologists Wendy Espeland and Michael Sauder delve deep into the mechanisms of law school rankings which have become a top priority within legal education Based on a wealth of observational data and over 200 in depth interviews with law students

university deans and other administrators they show how the scramble for high rankings has affected the missions and practices of many law schools *Engines of Anxiety* tracks how rankings such as those published annually by the U S News World Report permeate every aspect of legal education beginning with the admissions process The authors find that prospective law students not only rely heavily on such rankings to evaluate school quality but also internalize rankings as expressions of their own abilities and flaws For example they often view rejections from first tier schools as a sign of personal failure The rankings also affect the decisions of admissions officers who try to balance admitting diverse classes with preserving the school s ranking which is dependent on factors such as the median LSAT score of the entering class Espeland and Sauder find that law schools face pressure to admit applicants with high test scores over lower scoring candidates who possess other favorable credentials *Engines of Anxiety* also reveals how rankings have influenced law schools career service departments Because graduates job placements play a major role in the rankings many institutions have shifted their career services resources toward tracking placements and away from counseling and network building In turn law firms regularly use school rankings to recruit and screen job candidates perpetuating a cycle in which highly ranked schools enjoy increasing prestige As a result the rankings create and reinforce a rigid hierarchy that penalizes lower tier schools that do not conform to the restrictive standards used in the rankings The authors show that as law schools compete to improve their rankings their programs become more homogenized and less accessible to non traditional students The ranking system is considered a valuable resource for learning about more than 200 law schools Yet *Engines of Anxiety* shows that the drive to increase a school s rankings has negative consequences for students educators and administrators and has implications for all educational programs that are quantified in similar ways **Worlds of Rankings** Leopold Ringel, Wendy

Espeland, Michael Sauder, Tobias Werron, 2021-07-22 This volume contains an Open Access Chapter This volume explores the distinct allure of rankings in diverse empirical settings such as healthcare the IT sector the arts professional sports anti slavery advocacy the pharma industry and educational governance Privilege and Prejudice Karen Weekes, 2020-10-27 *Privilege and Prejudice* Twenty Years with the Invisible Knapsack explores various areas of contemporary American culture where sexism and racism still leave an indelible print In 1988 Peggy McIntosh published her groundbreaking essay *White Privilege and Male Privilege* an examination of white privilege and its role in perpetuating racism Twenty years later these seven essays reveal problems that persist even in systems that are ostensibly trying to address problems of inequality Beginning with a foreword by McIntosh on our society s resistance to confronting privilege this text then delves into a variety of fields In the first section on higher education Simona Hill Lucien Winegar Juanita Johnson Bailey and Ronald Cervero contribute two essays examining racism in the academy while Donna Axel explores the stigma in law school alternative application processes The next section interrogates privilege and its effects on females choices with Kyla Bender Baird questioning global contraception policies and Mary Carney giving a historical overview to contextualize persistent gender

inequities in computer technology Media studies and stereotypes are considered in the final section in which Janice Stapley analyzes children's birthday cards for gender bias and Ellen Miller critiques male dance films This text would be useful for social science and humanities scholars of all types with its explorations of the continuing ramifications of race gender class and their intersections **The Internationalization of Law and Legal Education** Jan Klabbers, Mortimer

Sellers, 2009-01-29 The internationalization of commerce and contemporary life has led to a globalization of legal standards and practices The essays in this text explore this new reality and suggest ways in which the new legal order can be made more just and effective **The Law School Buzz Book** Vault Editors, 2006-02-07 In this new edition Vault publishes the

entire surveys of current students and alumni at more than 100 top law schools Each 4 to 5 page entry is composed of insider comments from students and alumni as well as the school's responses to the comments **Governance by Indicators**

Kevin Davis, Angelina Fisher, Benedict Kingsbury, Sally Engle Merry, 2012-07-05 The use of indicators as a technique of global governance is increasing rapidly Major examples include the World Bank's Doing Business Indicators the World Bank's Good Governance and Rule of Law indicators the Millennium Development Goals and the indicators produced by Transparency International Human rights indicators are being developed in the UN and regional and advocacy organizations The burgeoning production and use of indicators has not however been accompanied by systematic comparative study of or reflection on the implications possibilities and pitfalls of this practice This book furthers the study of these issues by examining the production and history of indicators as well as relationships between the producers users subjects and audiences of indicators It also explores the creation use and effects of indicators as forms of knowledge and as mechanisms of making and implementing decisions in global governance Using insights from case studies empirical work and theoretical approaches from several disciplines the book identifies legal policy and normative implications of the production and use of indicators as a tool of global governance The Comprehensive Guide to Careers in Sports Glenn M. Wong, 2013 Provides

an overview of what students should consider and expect from the varied career options available to them in the sports industry This book answers the questions students are most likely to have including what courses they should take the areas of study available to them the salary they can expect to earn after graduation and how they can get the job of their dreams This essential guide will help increase students' likelihood of finding careers in the highly competitive sports industry

Rankings and the Reshaping of Higher Education Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars Law School Rankings, Faculty Scholarship, and Associate

Deans for Faculty Research Richard Buckingham, 2008 The authors contend that a boom in law school rankings has encouraged many U S law schools to take new measures to encourage and publicize faculty scholarship The establishment of

associate deans for faculty research is one such measure The authors conducted a study to determine the number of law schools that have these dean level positions They argue that many law schools have established these positions as part of their efforts to improve their standing in the increasingly important rankings The authors begin with a historical overview of the original law school model and discuss how that model evolved over time They focus on how those changes led to a competitive law school market that helped lay the groundwork for U S News amp World Report and other law school rankings They then explore numerous alternative ranking methodologies and conclude with a study of ABA accredited law schools that have appointed associate deans for faculty research

Failing Law Schools Brian Z. Tamanaha, 2022-12-22 An essential title for anyone thinking of law school or concerned with America s dysfunctional legal system Library Journal On the surface law schools today are thriving Enrollments are on the rise and law professors are among the highest paid Yet behind the flourishing facade law schools are failing abjectly Recent front page stories have detailed widespread dubious practices including false reporting of LSAT and GPA scores misleading placement reports and the fundamental failure to prepare graduates to enter the profession Addressing all these problems and more is renowned legal scholar Brian Z Tamanaha Piece by piece Tamanaha lays out the how and why of the crisis and the likely consequences if the current trend continues The out of pocket cost of obtaining a law degree at many schools now approaches 200 000 The average law school graduate s debt is around 100 000 the highest it has ever been while the legal job market is the worst in decades Growing concern with the crisis in legal education has led to high profile coverage in the Wall Street Journal and the New York Times and many observers expect it soon will be the focus of congressional scrutiny Bringing to the table his years of experience from within the legal academy Tamanaha provides the perfect resource for assessing what s wrong with law schools and figuring out how to fix them *Failing Law Schools* presents a comprehensive case for the negative side of the legal education debate and I am sure that many legal academics and every law school dean will be talking about it Stanley Fish Florida International University College of Law
