

Recent World Bank Report:

« Inflation decline, Afghani appreciation against other currencies, domestic price stability and improvement of the banking sector of Afghanistan »

The World Bank (WB) has recently published a report on July 31, 2023, highlighted that the economy of Afghanistan has been improved. The report illustrates that the inflation rate has been dropped compared to the previous months and Afghani appreciated against other currencies. As a result, the primary objective of Da Afghanistan Bank, which is domestic price stability, has been achieved and managed properly. It also revealed that the banking sector of the country has been improved, owing to implementation of effective and prudential policies of Da Afghanistan Bank. At the same time, WB has also pointed out to the increase in the country domestic products, creation of employment opportunities, timely payment of the rights and privileges of the civil servants, quality health services delivery, rise in the exports and national income of Afghanistan and providing appropriate business opportunities. It has to be mentioned that releasing likewise reports, which are naturally based on expert evaluations and analyses, demonstrates that Afghanistan is taking fast steps in a positive direction and that economic affairs are managed properly. DAB, while welcoming all positive points based on objective facts of this report, is confident that positive interaction of international community with Afghanistan, removing the current restrictions on the banking sector and unfreezing foreign exchange reserves of Afghanistan is leading to further economic growth and will be pushed towards further strengthening and stability. In reference to the WB report, DAB leadership assures that the bank is committed to maintaining the stability of financial and banking sector, given the best regulatory and supervisory practices and strategies and continues to take effective and useful measures for controlling inflation and maintaining Afghani stability, until the country flourishes further.

The Universal Social Safety-Net and the Attack on World Poverty Anthony Clunies-Ross, Mozammel Huq, 2013-10-30 The book is concerned with strategy and tactics for directing that small slice of world income into filling the gap This must be done country by country on the initiative of each country s government with the maximum involvement of its own civil society and with the rich world also making a contribution To add momentum the international community needs to adopt targets far more specific than the fifty percent extreme poverty reduction of the first

Millennium Development Goal **Global Uncertainty and the Volatility of Agricultural Commodities Prices** B.R. Munier, 2012-04-24 The recent global financial crisis exposed the serious limitations of existing economic and financial models. Not only did macro models fail to predict the crisis, they seemed incapable of explaining what was happening to the economy. Policymakers felt abandoned by the conventional tools of the now obsolete Washington consensus and the World Trade Organization's oversimplified faith in free markets. The traditional models for agricultural commodities have so far failed to take into account the uncertain character of the global agricultural economy and its ferocious consequences in food price volatility, the worst in 300 years, yielding hunger riots throughout the world. This book explores the elements which could help to close this fundamental modeling gap. To what extent should traditional models be questioned regarding agricultural commodities? Are prices on these markets foreseeable? Can their evolution be either predicted or convincingly simulated, and if so, by which methods and models? Presenting contributions from acknowledged experts from several countries and backgrounds, professors at major international universities or researchers within specialized international organizations, the book concentrates on four issues: the role of expectations and capacity of prediction; policy issues related to development strategies and food security; the role of hoarding and speculation; and finally, global modeling methods. The book offers a renewed wisdom on some of the core issues in the world economy today and puts forward important innovations in analyzing these core issues, among which the modular modeling design, the Momagri model, being a seminal example of it. Reading this book should inspire fruitful revisions in policy making to improve the welfare of populations worldwide.

Corporations, Global Governance, and Post-conflict Reconstruction Peter Davis, 2013 In the past two decades, the international community has shown an increased proclivity to engage in programmes of post-conflict reconstruction in the aftermath of wars. During the same period, increased globalisation has meant that multinational companies have grown greatly in size and influence and have begun to challenge existing notions of governance at a global level. Here Peter Davis explores the reconstruction processes that have taken place in Azerbaijan, Bosnia and Rwanda. Based on extensive field work as well as existing literature, this book plots the recovery of these countries from conflict and examines in detail the role that international companies have played in that process. The book also explores how companies' impacts on reconstruction are governed both by the companies themselves and by the host government and international agencies managing the rebuilding process.

Climate change, water and agriculture in the Greater Mekong Subregion, 2010 The impacts of climate change on agriculture and food production in Southeast Asia will be largely mediated through water, but climate is only one driver of change. Water resources in the region will be shaped by a complex mixture of social, economic and environmental factors. This report reviews the current status and trends in water management in the Greater Mekong Subregion, assesses likely impacts of climate change on water resources to 2050, examines water management strategies in the context of climate and other changes, and identifies priority actions for governments and communities to improve resilience of the water sector and

Congress. Senate. Committee on Agriculture, Nutrition, and Forestry,2012 Economic Growth and Employment in Vietnam David Lim,2014-03-21 Vietnam has enjoyed significant economic success since the implementation of its doi moi reforms including rapid growth in GDP exports and foreign and domestic investment and a shedding of poorly performing state owned enterprises Despite this however the economic situation for many ordinary people in Vietnam is fragile with income only just above the poverty line and high unemployment especially among the young In addition inflation is high and the state owned sector is still large much of it still performing badly This book provides a comprehensive overview of the current economic situation in Vietnam It outlines the state of the economy paying special attention to employment discusses government policies including on trade and integration with the global economy and concludes by assessing the key challenges facing Vietnam s economy going forward Critical Food Issues Laurel Phoenix,Lynn Walter,2009-09-03 This authoritative research based collection examines urgent threats to future global food security and evaluates current and potential solutions Critical Food Issues Problems and State of the Art Solutions Worldwide examines 31 crucial areas of concern from soil degradation depletion of water for irrigation and loss of biodiversity to declining rural livelihoods hunger and obesity unjust farm labor practices and farm animal mistreatment Critical Food Issues divides its coverage into two exhaustive volumes one on bioenvironmental topics and one with a sociocultural focus Throughout highly accomplished experts from a variety of academic backgrounds review the current state of research on

specific problems then identify strategies for confronting those problems that balance sustainable agrifood systems with environmental stewardship healthy people and equitable communities At a time of increasing public outcries over the quality of food and the impact of agrifood production on long term environmental and human well being Critical Food Issues offers an authoritative and comprehensive basis on which producers consumers and citizens can make more informed decisions about the future of food

Multinationals and Economic Geography Simona Iammarino, Philip McCann, 2013-01-01 The world economy is subject to a rapidly increasing globalization and multinational enterprises are their major driving force This brand new book on multinationals and economic geography by two world leading economic geographers is a landmark that provides an integrated and dynamic perspective on the economic geography of the multinational enterprise To fully understand this process of globalization the book explains forcefully and persuasively that one needs a dynamic perspective on multinational enterprises that brings together disparate literatures on economic geography knowledge and innovation global network cities and international business and management Embedding it in modern theory of innovation and geography the book provides not only a state of the art of theories and empirics on the location of multinationals but goes far beyond that This book is an absolute must read for any scholar and any student that is interested in multinationals and their location Ron Boschma Utrecht University The Netherlands and Lund University Sweden Despite often playing second fiddle to clusters in the economic geography literature multinationals are fundamental drivers of economic development As generators and diffusers of knowledge they have played an essential role in shaping the new world economic order No book captures this better than Simona Iammarino and Philip McCann s Multinationals and Economic Geography a must read for anyone eager to fully understand the new economic geography of globalisation Andr s Rodr guez Pose London School of Economics UK After more than fifty years of systematic research on multinational enterprises MNEs what is apparent is that there is as yet no unified or dominant theory of the MNE The objective of this book is to bring into focus one particular dimension of MNE behaviour and activity that has been relatively under researched namely the geography of the multinational enterprise as understood through the lens of innovation and technological change The authors clearly demonstrate that geography is becoming increasingly important for MNEs and in turn MNEs are becoming progressively more important for economic geography The pivot on which this vital relationship turns is the creation diffusion and management of new knowledge This unique book will prove a fascinating read for academics students and researchers across a broad range of areas including geography economic geography regional science international business and management innovation studies economic development Professionals such as corporate managers and policymakers in these fields would also find this book to be of great interest

Innovation and Growth Chasing a Moving Frontier The World Bank, OECD, 2009-11-20 In this volume the OECD and the World Bank jointly take stock of how globalisation is posing new challenges for innovation and growth in both developed and developing countries and how countries are coping with them
