Dupuy,2023-09-20 The fact that the Montego Bay Convention has been only ratified by 37 States at present and that it will be some time before the 60 ratifications required by Article 308 are achieved has not prevented states from acting in accordance with the rules drawn up by the Conference Close on one hundred states have established either exclusive economic zones broadly modelled on Part V or 200 nautical mile fishery zones and drawn on the principles laid down for exploiting living resources Although these laws have been formulated unilaterally by states international custom since the judgement by the International Court of Justice in the Fisheries Case of 18 December 1951 is derived from concordant national rules This shift began even before the Conference ended and has been consolidated since then Moreover the r gime governing the sea bed beyond the limits of national jurisdiction defined by Part XI which was the stumbling block of the Conference is subject to transitional arrangements on the basis of two resolutions adopted in the Conference s Final Act one providing for the establishment of a Preparatory Commission and the other on the preliminary activities of pioneer investors This two volume work an earlier edition of which appeared in French has been written by a team of experts of international renown It presents an analysis of the Convention with an additional Chapter on the legal r gime governing underwater archaeological and historical objects Beyond Blue Skies Chris Petty,2020-11 In 1945 some experts still considered the so called sound barrier an impenetrable wall while winged rocket planes remained largely relegated to science fiction But soon a series of unique rocket powered research aircraft and the dedicated individuals who built maintained and flew them began to push the boundaries of flight in aviation s quest to move ever higher ever faster toward the unknown Beyond Blue Skies examines the thirty year period after World War II during which aviation experienced an unprecedented era of progress that led the United States to the boundaries of outer space Between 1946 and 1975 an ancient dry lakebed in California s High Desert played host to a series of rocket powered research aircraft built to investigate the outer reaches of flight The western Mojave s Rogers Dry Lake became home to Edwards Air Force Base NASA s Flight Research Center and an elite cadre of test pilots Although one of them Chuck Yeager would rank among the most famous names in history most who flew there during

those years played their parts away from public view The risks they routinely accepted were every bit as real as those facing NASA s astronauts but no magazine stories or free Corvettes awaited them just long days in a close knit community in the High Desert The role of not only the test pilots but the engineers aerodynamicists and support staff in making supersonic flight possible has been widely overlooked Beyond Blue Skies charts the triumphs and tragedies of the rocket plane era and the unsung efforts of the men and women who made amazing achievements possible *Jet Fighters of the U. S. Navy and Marine Corps, Part 2* Bert Kinzey, 2025-01-04 Jet Fighters of the U S Navy and Marine Corps is a two book series that describes the entire history of American Naval jet fighters from the very beginning when many thought that the onset of military jets would mean the end of naval carrier based aviation to today when the fifth generation stealth jet F 35B C Lightning II has begun its service with both the Navy and Marine Corps Both volumes cover every jet fighter that has ever been produced for the Navy and the Marine Corps and not only those that were used operationally but even the aircraft that only made it to the flying prototype stage are included Also covered by the books is the history of how American aircraft carriers evolved from the ESSEX class ships that won World War II with propeller driven aircraft to the mighty supercarriers of today In the first book Jet Fighters of the U S Navy and Marine Corps Part 1 The First Ten Years author Bert Kinzey described the first and second generation jet fighters that came on the scene at the end of or shortly after World War II These jet fighters made their first flights between 1945 and 1954 and the book covers fifteen aircraft arranged according to the chronological order of the date of their first flight This concluding volume Jet Fighters of the U S Navy and Marine Corps Part 2 Mach 1 and Beyond resumes where Part 1 left off and continues to the present day The evolution of the United States Navy s aircraft carriers is again picked up and covers continued modifications to the ESSEX and MIDWAY class carriers and to the initial super carriers of the FORRESTAL CLASS The follow on super carriers of the KITTY HAWK NIMITZ and FORD classes are discussed to highlight the continued evolution required to handle the ever increasingly sophisticated jet aircraft that have achieved operational status The thirteen aircraft covered in Part 2 begin with the Chance Vought F 8 Crusader the first Navy and Marine jet fighter able to routinely exceed supersonic speeds and which brought U S Navy jet fighters on par in performance to their land based counterparts As with Part 1 the scope of this publication includes all Navy jet fighter designs that reached at least the flying prototype stage so the F11F 1F Super Tiger F5D Skylancer and XF8U 3 Crusader III each of which was developed from an existing aircraft design are all covered Also included is the F 111B Secretary of Defense Robert McNamara s vision of a be all do all aircraft for both the Navy and the Air Force It was a concept which at that time was simply not possible to achieve Of all the Navy and Marine jet fighters that became operational during the first ten years only three the F9F Panther F2H Banshee and F3D Skyknight ever engaged in combat But the world was changing and all of the fighters covered here in Part 2 that became operational with fleet squadrons saw and continue to see plenty of combat around the world The Navy and Marines have also operated three different types of jet fighters as well as other types

of aircraft strictly in a training role that of serving as adversary aircraft in dissimilar air combat training DACT These include the American built F 5E F N Tiger II and F 16 Fighting Falcon and the Israeli F 21A Kfir These fighters are also included in this publication As this book is published in 2020 the primary jet fighter for the U S Navy is the F A 18E F Super Hornet and the F 35C is just beginning to enter the inventory with the Navy s first fleet squadron being declared operational in 2019 Meanwhile F 35Bs are already serving in considerable numbers with the Marines as they replace both the AV 8B Harrier II and eventually some F A 18 Hornets These aircraft are covered in the final chapters bringing the reader up to date on the newest multi role jet fighters now serving in U S Naval and Marine Aviation Together Jet Fighters of the U S Navy and Marine Corps Part 1 and Part 2 cover every jet fighter that has been designed built and at least reached the flying prototype stage since the FH 1 Phantom first took to the air in 1945 The remarkable history of these aircraft the problems faced the solutions developed and the successes achieved provide incredibly interesting reading for the aviation enthusiast But it is not just about each individual aircraft that took to the air Equally as important and fascinating are the multitude of engineering challenges developing technologies the ever changing roles and requirements and the tactics and strategies used in deploying these aircraft with their increasing capabilities as they fulfilled their roles in defending the national interests of the United States around the world The digital edition of Jet Fighters of the U S Navy and Marine Corps Part 2 Mach 1 and Beyond features 207 pages 213 high resolution photographs 193 of which are in color and 10 full color profiles

Authenticating Criteria in Jesus Research and Beyond Kevin B. Burr, 2023-10-16 Are the criteria of authenticity of Jesus research idiosyncratic to New Testament studies vehicles of subjectivity and fundamentally flawed vestiges of form criticism as some claim today If so why do opponents of the criteria approach still use them Or are the criteria the tools of general historiography as others assert If true none have adequately demonstrated where and how principles such as multiple attestation general and historical coherence dissimilarity and embarrassment feature in general historiographic method until now This study analyzes the methods of general historians and Jesus researchers who favor or oppose the criteria and demonstrates that regardless of sub discipline authenticating criteria are inherent to the practice of

historiography **Organizations at War in Afghanistan and Beyond** Abdulkader H. Sinno, 2008 While popular accounts of warfare particularly of nontraditional conflicts such as guerrilla wars and insurgencies favor the roles of leaders or ideology social scientific analyses of these wars focus on aggregate categories such as ethnic groups religious affiliations socioeconomic classes or civilizations Challenging these constructions Abdulkader H Sinno closely examines the fortunes of the various factions in Afghanistan including the mujahideen and the Taliban that have been fighting each other and foreign armies since the 1979 Soviet invasion Focusing on the organization of the combatants Sinno offers a new understanding of the course and outcome of such conflicts Employing a wide range of sources including his own fieldwork in Afghanistan and statistical data on conflicts across the region Sinno contends that in Afghanistan the groups that have outperformed and outlasted their opponents have done so because of their successful organization Each organization's ability to mobilize effectively execute strategy coordinate efforts manage disunity and process information depends on how well its structure matches its ability to keep its rivals at bay Centralized organizations Sinno finds are generally more effective than noncentralized ones but noncentralized ones are more resilient absent a safe haven Sinno's organizational theory explains otherwise puzzling behavior found in group conflicts the longevity of unpopular regimes the demise of popular movements and efforts of those who share a common cause to undermine their ideological or ethnic kin The author argues that the organizational theory applies not only to Afghanistan where he doubts the effectiveness of American state building efforts but also to other ethnic revolutionary independence and secessionist conflicts in North Africa the Middle East and beyond
