

Assignment A: Worksheet: Depression

16. Analyzing studies with longitudinal design (over time) does present a challenge, and the follow-up studies can be quite tedious for both of the following reasons:

1. Participant attrition: Individuals who are initially in the study may drop out of the study at any time, leading to a loss of data and potentially biasing the results.	2. Measurement error: The same individuals may be measured at different points in time, and the measurement error may vary across time, leading to inconsistent results.
---	---

3. Changes in the environment: The environment can change over time, leading to changes in the behavior of the individuals being studied, which can confound the results.	4. Changes in the measurement: The measurement of the same variable may change over time, leading to inconsistent results.
--	---

5. Changes in the study design: The study design may change over time, leading to changes in the data collection and analysis, which can confound the results.	6. Changes in the sample: The sample of individuals being studied may change over time, leading to changes in the results.
---	---

7. Changes in the measurement: The measurement of the same variable may change over time, leading to inconsistent results.	8. Changes in the sample: The sample of individuals being studied may change over time, leading to changes in the results.
---	---

9. Changes in the measurement: The measurement of the same variable may change over time, leading to inconsistent results.	10. Changes in the sample: The sample of individuals being studied may change over time, leading to changes in the results.
---	--

17. **Conclusion:** The study is a good example of a study that is well designed and executed, and the results are clear and convincing.
