Health Care Computing Philip Burnard,2013-11-11 Most health professionals have to use computers at least some of the time Frequently those computers are personal computers the generic name for the ones that are variously known as IBM compatible or IBM clones or just PCs This separates them out from certain other makes such as the Apple Macintosh the Amstrad dedicated word processor the Atari Amiga and a number of others This book is about PCs When you need information about your computer when you are busy you don t want to have to wade through piles of manuals to find what you need You often need a fairly straightforward

piece of information now Computers can be infuriating When they are up and running properly they can save time and help you to be more productive When something goes wrong they can be extremely frustrating Once you have called in someone else to fix your problem it is often apparent that the answer to your problem was only a few keystrokes away This book aims at supplying you with small chunks of information that can aid your productivity get you out of awkward corners and help you to become more at home with your Pc It has been my experience as a health care lecturer and as a regular computer user that you need to develop a certain baseline of confidence in working with them The Standard Periodical Directory ,1993
