

### 8.3 Cleaning the pistol

#### CAUTION!

##### Pistol may be damaged

- Never clean barrel **1** from the muzzle end and do not use a steel wire brush as it can destroy the smooth surface of the barrel. Use a suitable cleaning rod and a brush of matching calibre (see Section 12).
- Solvents can be harmful to the surface finish of the pistol. Read the manufacturer's indications and warnings before using solvents or cleansers.

##### Procedure:

1. Lubricate the cleaning brush with gun oil and insert it into the barrel **1** via the chamber. Use brush to carefully remove all powder residues and dirt in the barrel and chamber.
2. Wipe powder residues and oil from the barrel bore and chamber with cleaning patches.
3. Clean external surfaces of barrel with a brush dipped in gun oil.
4. Remove dirt from metal guide in the frame **13**, inside and outside of slide **4**, locking insert **14** and recoil spring **3** with a brush and cleaning patch and then wipe down with a cloth impregnated with gun oil or gun grease.
5. Lightly oil bores of barrel and chamber. Remove any excess lubricant.
6. If the weapon is extremely dirty (water, sand, mud etc.), the grip plate should be removed in addition to normal cleaning (see section 6.2.1). This way the trigger mechanism can be thoroughly cleaned.

*Understanding Options for Agricultural Production* G.Y. Tsuji, G. Hoogenboom, P.K. Thornton, 2013-03-14. The first premise of this book is that farmers need access to options for improving their situation. In agricultural terms, these options might be management alternatives or different crops to grow that can stabilize or increase household income, that reduce soil degradation and dependence on off-farm inputs, or that exploit local market opportunities. Farmers need a facilitating environment in which affordable credit is available if needed, in which policies are conducive to judicious management of natural resources, and in which costs and prices of production are stable. Another key ingredient of this facilitating environment is information: an understanding of which options are viable, how these operate at the farm level, and what their impact may be on the things that farmers perceive as being important. The second premise is that systems analysis and simulation have an important role to play in fostering this understanding of options, traditional field experimentation being time-consuming and costly. This book summarizes the activities of the International Benchmark Sites Network for Agrotechnology Transfer (IBSNAT) project, an international initiative funded by the United States Agency for International

Development USAID IBSNAT was an attempt to demonstrate the effectiveness of understanding options through systems analysis and simulation for the ultimate benefit of farm households in the tropics and subtropics The idea for the book was first suggested at one of the last IBSNAT group meetings held at the University of Hawaii in 1993      **Cars & Parts** ,1974
