

PAINTING POWER ARMOUR

Painting guides often focus on a single method of painting power armour – here we take a look at some alternatives. There is no right or wrong way to paint your Space Marines; just take a look at

these examples and decide which technique you like the look of the most. However, most players find that a combination of the techniques works best, rather than employing them in isolation.

Drybrushing

Drybrushing is not a technique that normally lends itself to Space Marines, as it generally looks a little harsh when applied to smooth, flat areas. However, the

advantage of this technique is that it allows you to paint models very quickly – some players like the trade-off in order to get an army on the table as soon as possible.

Step 1: After undercoating, a basecoat of Mordian Blue was applied to the whole of the model.

Step 2: A 2:1 mixture of Ultramarines Blue and Space Wolves grey was drybrushed on.

Step 3: A final drybrush of Space Wolves Grey was applied to the power armour.

Layering

The layering technique, used well, can be a great way of getting Space Marines battle-ready. This technique relies on the

smooth application of progressively lighter layers of paint, leaving the darkest layers in the very deepest recesses.

Step 1: A basecoat of Orkhide Shade was applied to the helmet.

Step 2: A highlight layer of 1:1 Orkhide Shade and Snoot Green was painted on to the upper surfaces of the helmet, leaving the basecoat showing in the recesses.

Step 3: A final highlight of pure Snoot Green was applied to the edges and uppermost surfaces of the helmet.

Top Tip

Undercoating

While many painters swear by a Chaos Black undercoat for their models, there's just as much reason to use Skull White. Generally, if your overall colour scheme is dark, choose black, and if it's light or bright, use white.

Technique

Washing In The Recesses

A very quick way of adding definition to Space Marine models is to wash Badab Black into the recesses. Use several applications to get a strong shade.
