Pokorn,2022-01-15 This book stems from the joint effort of 25 research teams across Europe representing a dozen disciplines from the social sciences and humanities resulting in a radically novel perspective to the challenges of multilingualism in Europe The various concepts and tools brought to bear on multilingualism are analytically combined in an integrative framework starting from a core insight in its approach to multilingualism Europe is pursuing two equally worthy but non converging goals namely the mobility of citizens across national boundaries and hence across languages and cultures and the preservation of Europe s diversity which presupposes that each locale nurtures its linguistic and cultural uniqueness and has the means to include newcomers in its specific linguistic and cultural environment In this book scholars from applied linguistics economics the education sciences finance geography history law political science philosophy psychology sociology and translation studies apply their specific approaches to this common challenge Without compromising the state of the art analysis proposed in each chapter particular attention is devoted to ensuring the cross disciplinary accessibility of concepts and methods making this book the most deeply interdisciplinary volume on language policy and planning published to date
