The Memage Of The Internet English Edition:

Conductor: Distributed Adaptation for Heterogeneous Networks Mark D. Yarvis, Peter Reiher, Gerald J. Popek, 2012-12-06

Internet heterogeneity is driving a new challenge in application development adaptive software Together with the increased Internet capacity and new access technologies network congestion and the use of older technologies wireless access and peer to peer networking are increasing the heterogeneity of the Internet Applications should provide gracefully degraded levels of service when network conditions are poor and enhanced services when network conditions exceed expectations Existing adaptive technologies which are primarily end to end or proxy based and often focus on a single deficient link can perform poorly in heterogeneous networks Instead heterogeneous networks frequently require multiple coordinated and distributed remedial actions *Conductor Distributed Adaptation for Heterogeneous Networks* describes a new approach to graceful degradation in the face of network heterogeneity distributed adaptation in which adaptive code is deployed at multiple points within a network The feasibility of this approach is demonstrated by conductor a middleware framework that enables distributed adaptation of connection oriented application level protocols By adapting protocols conductor provides application transparent adaptation supporting both existing applications and applications designed with adaptation in mind *Conductor Distributed Adaptation for Heterogeneous Networks* introduces new techniques that enable distributed adaptation making it automatic reliable and secure In particular we introduce the notion of semantic segmentation which maintains exactly once delivery of the semantic elements of a data stream while allowing the stream to be arbitrarily adapted in transit We also introduce a secure architecture for automatic adaptor selection protecting user data from unauthorized adaptation These techniques are described both in the context of conductor and in the broader context of distributed systems Finally this book presents empirical evidence from several case studies indicating that distributed adaptation can allow applications to degrade gracefully in heterogeneous networks providing a higher quality of service to users than other adaptive techniques Further experimental results indicate that the proposed techniques can be employed without excessive cost Thus distributed adaptation is both practical and beneficial *Conductor Distributed Adaptation for Heterogeneous Networks* is designed to meet the needs of a professional audience composed of researchers and practitioners in industry and graduate level students in computer science

Remy is about to launch herself into the alternative fashion world and Silk is going to sell it for her whether he knows it or not. But Silk is nobody's toy and for all his androgyny he's determinedly heterosexual. Pity since Remy's biggest fantasy is to see him making out with her sort of boyfriend Japanese biker Takeshi. ANYTHING BUT ORDINARY. Their no strings affair is about to get complicated. One disastrous marriage was all it took for Ric Liddell to give up on commitment so when his no strings arrangement with Zach Blackwater and Kara North hits the rocks due to a plague of interfering busybodies he retreats to what feels safe: sex. Filthy sex and even more filthy sex in no particular order. Zach wants Ric and not just for their connection in the sack. When his lover hurts him he's willing to look elsewhere for the stability he craves and he doesn't have to look far because Kara's right there. The guys are hot and the sex is dirty but for Kara caught in the middle of Zach and Ric's emotional absurdity it's painfully clear their threesome just can't last. Unless they can somehow set their fears aside and accept they need one another to be whole. Three is a collection of three standalone contemporary menage novels that includes sword crossing scenes of a spicy nature, angst drama and happily ever after endings.
